INTRODUCTION

The year 2025 marks 11 years of Prime Minister Narendra Modi's government. These 11 years have been dedicated to bring about development which is inclusive, progressive, and sustainable. The government under Prime Minister Modi has been steadfast in its commitment of creating equity and opportunity for all citizens.

PM Modi has brought the politics of development - Vikasvaad - into the mainstream, making it the focal point around which political discourse and policy action now revolves.

Since assuming office in 2014, PM Modi has remained firm in his resolve of keeping 'India First' in every policy formulation and action. This resolve is evident in government's handling of both external and internal security, economic management, empowerment schemes for marginalised groups, efforts at cultural conservation and so on.

Prime Minister Modi's

government has always believed in setting challenging targets, and achieving them before the set deadline. This can be seen across sectors- whether it is in vaccinating the entire eligible population in record time against Covid-19, recording the nation's highest ever exports in history, in the digital revolution which is taking place across India, in achieving monumental targets for rural electrification, in building world class infrastructure or in providing drinking water facilities across households.

In the last 11 years, there has been a paradigm shift in public service delivery and the implementation of government schemes using the JAM Trinity-Jan Dhan, Aadhaar, and Mobile. JAM Trinity is the key enabler of India's transformed and well-developed digital landscape. It has removed intermediaries and permits direct transfer of benefits into an intended beneficiary's bank account.

For a country to prosper, it is imperative that its infrastructure grows rapidly and the government under PM Modi's dynamic leadership understands this. The completion of infrastructure projects that were delayed over decades, as well as starting and completing new ones has been the cornerstone of this government's developmental approach.

In stark contrast to the earlier piecemeal approach to development, the Modi government has brought in a culture of holistic development that leaves no one behind. The massive expansion of welfare coverage over the last 11 years has motivated all Indians to dream big and aspire for greater achievements.

The inclusive and holistic approach of development and welfare schemes has ensured irreversible empowerment for various marginalised groups, helping them become aspirational and self-reliant.

Under PM Modi, India has championed environmental protection globally, emerging as a leader of the movement. Like environment, under PM Modi's leadership, India is also committed towards preservation, and promotion of its rich cultural heritage. The United Nations declared June 21st as International Yoga Day, an acknowledgement of the global recognition of Indian heritage.

India's assertion on the global stage has also undergone a remarkable evolution. The success of Operation SINDOOR demonstrated a new India—resolute, swift, and sovereign in action.

After first assuming elected office in 2001 as Chief Minister of Gujarat and then becoming the Prime Minister of India in 2014, Narendra Modi has set a new benchmark in reforms and governance which has become a model for inclusive development not just for India but for many parts of the world. He has not only encouraged people to aspire but also provided adequate government

support for fulfilling their rising aspirations so every Indian, in 'Amrit Kaal', can be a part of India's growth story.

This book is a comprehensive compendium about India's transformation under PM Modi's visionary leadership across fourteen facets of policymaking, ranging from infrastructure to foreign policy to social justice. This is the story of 11 years of serving the underserved, empowering women, providing opportunities to the youth, and celebrating the farmer. This is the story of new India.

* * *

*Be it DBT,
or plans to provide facilities like
electricity, water, toilets to poor
people, all these have brought a
revolution at the grassroots level.
These schemes have filled the
poorest of the poor in the country
with a sense of respect and
security.*

- Narendra Modi

SERVING THE POOR AND MARGINALIZED

1

OVERVIEW

The Constitution treats every Indian citizen as equal, and guarantees a life of dignity for each of them. Yet despite several decades since independence, in the absence of basic facilities many Indians were living in abject poverty. Understanding the need for this unfortunate scenario to change an irreversible process of development was started with inclusive approach. Since 2014, the government led by Prime Minister Narendra Modi has initiated a development model in which no one is left behind.

This Development model guarantees basic facilities such as drinking water, electricity connections, healthcare, toilets, LPG cylinders, education, and financial inclusion to all, and not just to a privileged few.

In the last 11 years, the Modi government has launched and implemented several welfare schemes to empower every Indian.

The impact of such seamless and irreversible empowerment initiatives can be seen in programmes like MUDRA Yojana and Stand Up India, which are creating a large pool of young entrepreneurs from marginalised groups. More than half of the 52 crore

loans given under MUDRA have been given to SC/ST/OBC entrepreneurs.

This is ushering empowerment of not just individuals, but is also a means to empower the traditionally neglected communities.

In the spirit of inclusive social welfare, the Modi government's historic decision to provide reservations for economically weaker sections of upper castes provided much-needed support to poor households.

As part of its vision of inclusive development, the government has undertaken many reforms to empower Divyangjan, Transgender persons, Denotified and Nomadic tribes, and other such hitherto unserved or underserved groups. The government's resolve for social justice was evident in its decision to implement OBC and EWS reservations in all India quota seats in medical education, ensuring that students from these groups can also aspire to become doctors in affordable government colleges. Likewise, under the Namaste scheme, the government aims to eradicate unsafe sewer and septic tank cleaning practices, so that

sanitation workers can lead a life of dignity.

The most recent celebration of Janjatiya Gaurav Diwas took place from November 15 to 26, 2024, marking the 150th birth anniversary of Bhagwan Birsa Munda, a revered tribal freedom fighter. This observance aimed to honor the contributions of tribal communities to India's history and progress.

The government's efforts to extend welfare provisioning and poverty alleviation have received recognition from global institutions. A recent IMF paper has credited the Modi government for ending extreme poverty in the country. The Global Multidimensional Poverty Index (MPI), released by the United Nations Development Programme (UNDP) and the Oxford Poverty and Human Development Initiative (OPHI) has also credited India with a reduction in all ten of its Multidimensional Poverty Indicators. Serving the poor and the marginalized has been the underlying promise of the Modi government, a promise that is guided by the principle of 'Antyodaya' which means that the goal of development isn't complete till it reaches the last person in society.

POINTS TO REMEMBER

Antyodaya and saturation coverage end appeasement

Welfare schemes from 2014 have been motivated by the **principle of Antyodaya** (no one is left behind). It means the government is targeting 100% saturation in every scheme.

100% coverage means everyone will get the benefits of governance!

Viksit Bharat Sankalp Yatra reached 2.6 lakh gram panchayats and more than 4,000 urban local bodies in the country and aims to achieve the target of taking public welfare schemes to 100% saturation

Irreversible empowerment for marginalised groups

- Earlier, the attitude of certain governments was to patronise the marginalised groups by ensuring some **piecemeal benefits**.
- They wanted to **keep the people dependent** on them, and hence, irreversible empowerment was denied.
- But now, PM Modi has ensured a shift from patronage-based support to **irreversible empowerment**.
- Schemes like Stand Up India and MUDRA Yojana are empowering individuals from marginalised groups by providing entrepreneurship opportunities.
- These entrepreneurs will shape aspirations and become **role models for**

the entire community.

Ending the politics of low expectations and low delivery

- Once a gas connection is given, an electricity connection is given or a tap water connection is given, **no one can take it away**.
- Further, the poor become aspirational and have **higher expectations** since their basic needs are met.
- This creates greater expectations from governments and pushes them to deliver more.
- For a long time, India was **harmed by politics of low delivery and low expectations**. But now, that is being changed by PM Modi.

INCLUSIVE GOVERNANCE

Highest ever representation for SCs, STs, and OBCs in the Union Council of Ministers.

Introduction of **10% EWS quota** in higher education.

Reservation for **OBCs and EWS** in All India Quota seats in medical education.

Constitutional status to the National Commission for Backward Classes.

Protection of rights of transgender persons through '**The Transgender Persons (Protection of Rights) Act 2019**'.

Launch of **Nasha Mukht Bharat Abhiyan** to sensitise youth against drug use.

Establishing the National Commission for De-notified, Nomadic and Semi-Nomadic Tribes.

Divyangjan benefitted from the number of recognised disabilities being revised **from 7 to 21**.

PM Vishwakarma scheme

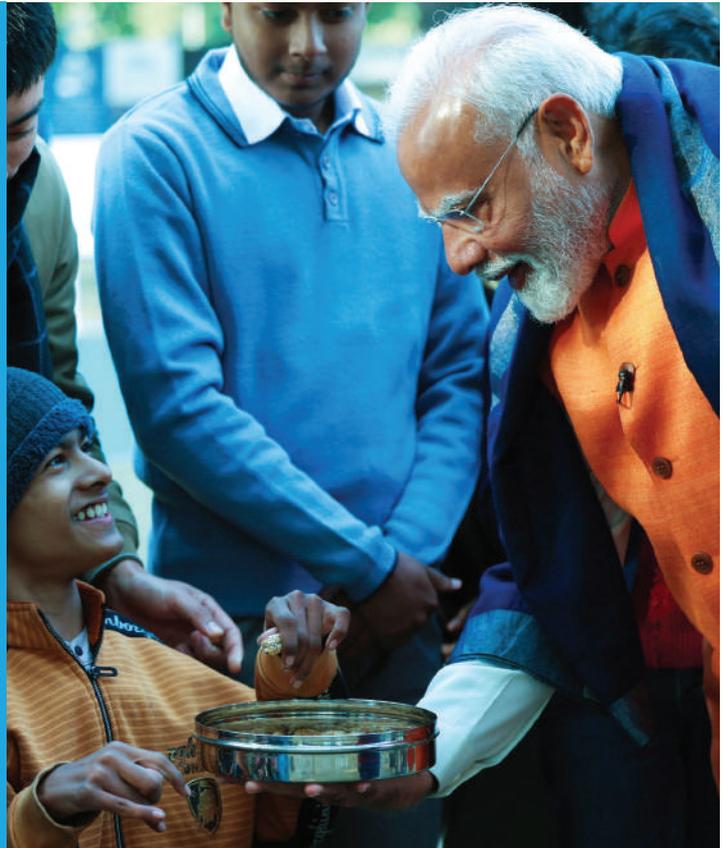

- PM Vishwakarma scheme is fully funded by the Central Government at a cost of **₹13 thousand crore**
- **Collateral-free loan up to ₹3 lakh** for Vishwakarma brothers and sisters
- Toolkit incentive upto **₹15 thousand**, skill upgradation, incentive for digital transaction and marketing support

DID YOU KNOW ?

The Ministry of Social Justice and Empowerment conducts camps to distribute assistive equipment to Divyangjan.

Since 2014, 18,000+ camps have been conducted, empowering over 31 lakh Divyangjan.

SOCIAL SECURITY AND EMPOWERMENT OF WORKERS

Thinking of platform workers

The growth of new age platforms such as aggregators has meant new kinds of jobs for workers. **India is among the first few countries to think of social security for them.**

Provision has been made for a contribution from aggregators between 1-2% of turnover, up to 5%, for providing benefits to them.

E-SHRAM FOR EMPOWERMENT

Around **30.82 crore** unorganised workers registered on the portal on self declaration basis

400 occupations, skill sets, education, income, social category, bank account details, captured

36 States/UT's onboarded e-Shram for data sharing to facilitate targeted delivery of social welfare schemes to unorganised workers

PRADHAN MANTRI SHRAM-YOGI MAANDHAN PENSION FOR UNORGANISED SECTOR WORKERS

51.31 lakh

unorganised sector workers registered on self declaration basis

₹ 3,000

assured Monthly pension they get after the age of 60

REDUCING BURDEN, IMPROVING COMPLIANCE

Employees' State Insurance Corporation contribution rates reduced

Employers' contribution reduced from 4.75% to 3.25%

Employees' contribution reduced from 1.75% to 0.75%

COVID-19 RELIEF FOR WORKERS

24%

-Proportion of the monthly wages paid to the EPF accounts of workers drawing wages less than ₹15,000 per month

- About **₹54,200 crore** disbursed by EPFO offices to 2.56 crore workers during 2019-20 to 2024-25

EMPOWERMENT THROUGH ENTREPRENEURSHIP

Loans to **68 lakh** street vendors under PM-SVANidhi scheme.

More than half of **52.5+ crore** MUDRA loans have been given to SC/ ST/OBC entrepreneurs.

2.74 lakh loans sanctioned under Standup India benefitting women/SC/ST entrepreneurs

Recognizing icons of social empowerment

Five prominent sites associated with Dr. B. R. Ambedkar redeveloped as the 'Panchteerth'

Janjatiya Gaurav Divas 2024 commemorated the 150th birth anniversary of Bhagwan Birsa Munda.

As of May 2025, the Government of India has sanctioned 11 Tribal Freedom Fighter Museums across 10 states to honor the contributions of tribal leaders in India's freedom struggle.

Prime Minister Narendra Modi paid tribute to the tribal icon and launched several initiatives aimed at uplifting tribal communities across India.

Garib

Food Security for All with PM Garib Kalyan Anna Yojana (PMGKAY)

World's biggest social welfare scheme,

extended for 5 years, aiming to provide food security to over **81 crore people**

Pucca Houses for Poor with PM Awas Yojana

**PMAY
Over 4 crore houses constructed**

allowing them a life of dignity and a place to call their own

Smokeless Kitchens with PM Ujjwala Yojana

More than 10.33 crore families

enjoy a healthier life with clean cooking fuel connections

Bharat is changing, and it is changing rapidly. People's self-confidence, their trust in the government, and the commitment to build a new Bharat is visible everywhere.

- PM Narendra Modi

EMPOWERING

GYAN

PRIME MINISTER NARENDRA MODI HAS PLACED UTMOST EMPHASIS ON INCLUSIVE GROWTH OF THE NATION, AND THEREFORE HAS GIVEN THE ROADMAP FOR FOCUSING ON GYAN: GARIB, YUVA, ANNADATA & NARI SHAKTI.

Annadata

Prosperity for Farmers with PM Kisan Samman Nidhi

Assured income of ₹6,000 to farmers every year; support of ₹3.7 lakh crore delivered to 11+ crore farmers so far, for their financial security

Access to Immediate Credit with Kisan Credit Cards

₹10 lakh crore have been provided to 7.71 crore farmers with Kisan Credit Cards, enabling easy and affordable access to credit for meeting their short-term working capital needs for agriculture and allied activities.

Modernised Agri-Infra with Agriculture Infrastructure Fund

₹1 lakh crore investment approved under AIF, a major step towards modernising farming practices and boosting farmer's income.

Nari Shakti

Financial Security for Daughters with Sukanya Samridhi Yojana

Securing every daughter's future through 4.2 crore Sukanya Samridhi Accounts for girls under 10 years of age, a promise of empowered future

Access to Clean Water with Jal Jeevan Mission

Over 15.6 crore families get access to clean tap water, nurturing the health and well-being of every woman, every family in rural areas

Increasing the income of the farmers, reducing the cost of farming, providing modern facilities to the farmers from seed to market is the priority of our government.

- Narendra Modi

ENSURING FARMER WELFARE

2

OVERVIEW

The farmers, agriculture, and its allied activities have always been key elements of India's socio-cultural life and economy. In the last 11 years, Indian agriculture has received new impetus, guided by Prime Minister Narendra Modi's "Beej Se Bazaar Tak" approach, which stands out for its comprehensiveness.

The government has extended income support through PM-Kisan Samman Nidhi, providing farmers with an assured cash transfer of ₹6,000 per year through Direct Benefit Transfer. This supplemental income, received through regular instalments, has cut out intermediaries and enabled even small and marginal farmers to purchase better quality inputs, improve their land productivity, and increase their income.

To offset the inherent risks associated with agriculture, the government introduced the Pradhan Mantri Fasal Bima Yojana, an agricultural insurance system that provides a safety net for farmers against uncontrollable factors like unseasonal rain, pest damage, post-harvest losses, etc. Similarly, the Pradhan Mantri Krishi Sinchayee Yojana has expanded irrigation coverage. India's foodgrain production has touched a new record of 347 MMT in 2024-25.

The results are visible. During the Covid-hit period of 2021-22,

India's foodgrain production touched a new record, with estimates for 2022-23 indicating even higher production. There has also been buoyant growth in the horticulture sector. The allied sectors of Indian agriculture—livestock, forestry & logging, and fishing & aquaculture—are witnessing robust growth and becoming a potential source for improving farmers' income.

The dairy sector, which employs more than eight crore farmers, is performing well. India ranks first in the world in milk production, second in egg production, second in fish production, and fifth in meat production.

To unlock the growth potential of the agriculture and allied sectors, the Government has introduced the Agricultural Infrastructure Fund, a financing facility operational from 2020-21 to 2032-33, for the creation of post-harvest management infrastructure and community farm assets.

The United Nations declared 2023 as the International Year of Millets. Termed "Shree Anna" to highlight its value as a superfood, millets—one of the oldest cultivated crops by humans—are also the crops of the future. In the words of the Prime Minister, "Millets are good for the consumer, cultivator, and the climate."

A priority for the government since 2014 has been the

modernization of Indian agriculture. The use of Soil Health Cards issued by the government has helped farmers make efficient use of various inputs and maximize their yield. Through multiple programmes like the National Mission on Natural Farming (NMNF), which promotes chemical-free and climate-smart agriculture, small farmers are being encouraged to adopt natural and organic farming. This has led to lower investments on inputs, higher income for farmers, and protection from the perils of climate change and other uncertainties.

To achieve the aim of "Beej Se Bazaar Tak", strengthening forward linkages of agriculture is necessary to improve the condition of farmers. Linking agriculture markets throughout the country through the e-NAM initiative has brought transparency and increased competition in agricultural markets.

The last 11 years have seen a paradigm shift in the Indian agriculture sector, making it modern, scientific, and prosperous. Today, the Indian farmer isn't just cultivating for India, but is confidently eyeing the world as a marketplace for its wide-ranging products. PM Modi envisages Indian products on every dining table in world.

REVIVING THE SPIRIT OF COOPERATION

Rooted in India's age-old values of collective progress, the cooperative movement is undergoing a robust revival. Once weakened by systemic inefficiencies, it is now re-energized through reforms under the Ministry of Cooperation, established in 2021.

Institutional Reforms & Digital Empowerment

- Model Bye-Laws adopted in 32 States/UTs enable 1+ lakh Primary Agricultural Credit Societies (PACS) to diversify into 25+ activities including dairy, water, fuel, and pharma services.
- Digital transformation through ERP-based computerization of 70,641 PACS (59,810 onboarded), linked with NABARD.
- New platforms by NCCF/NAFED streamline MSP procurement, while a National Cooperative Database and Ranking Framework ensure transparency.

Infrastructure and Income Expansion

- **20,700+** new cooperatives formed; **7,100+** dairy societies strengthened.
- World's largest grain storage plan launched: 11 pilot godowns (9,750 MT) and 500 more underway.
- Primary Agricultural Credit Societies (PACS) act as:
 - CSCs (46,571 delivering ₹81.6 Cr in e-services),
 - Jan Aushadhi Kendras (753 operational),
 - PMKSKs (36,592 upgraded),
 - LPG/fuel dealers, water supply managers, and FPOs.

National-Level Cooperatives with Global Vision

- NCEL: ₹5,396 crore exports; 9,425 members.
- BBSSL: 21,037 members for certified seeds.
- NCOL: 7,037 members; 24 organic products launched worth ₹167.1 lakh.

From urban women to women living in villages, women engaged in business, or women busy with household chores, the government has taken many steps to make their lives easier.

- Narendra Modi

”

NEW MOMENTUM FOR NARI SHAKTI

3

OVERVIEW

India's development is inextricably linked to the development of its women. With this acknowledgment, Prime Minister Narendra Modi's government in the last 11 years has put Nari Shakti at the forefront of India's development journey.

The Modi government understands that empowerment is not a one-stop solution; rather it requires a lifecycle-based approach towards women empowerment. In this regard, welfare programmes for women are designed in a manner to support them at different stages of life to overcome socio-economic barriers to their empowerment.

Mission Poshan is an integrated nutrition support programme to address the challenges of malnutrition in children, adolescent girls, pregnant women, and lactating mothers through a strategic shift in nutrition content and delivery and by the creation of a convergent ecosystem to develop and promote practices that nurture health, wellness, and immunity. Mission Shakti which comprises two sub-schemes 'Sambal' and 'Samarthya' for the safety, security, and empowerment of women. The existing schemes of One Stop Centres (OSC), Women Helplines (181-WHL), and Beti Bachao Beti Padhao (BBBP) together with a new component

of Nari Adalat have been made part of the Sambal sub-scheme; while the schemes of Pradhan Mantri Matru Vandana Yojana (PMMVY), Shakti Sadan (Ujjwala & Swadhar Greh), Working Women Hostel (Sakhi Niwas) and National Creche Scheme (Palna) have been subsumed in 'Samarthya'.

The impact of this approach has been evident in the outcomes, such as an improved sex ratio at birth which is now for the first time 1020 women per 1000 men, a rise in institutional deliveries, declining infant mortality, and a lower maternal mortality rate.

For Modi government providing women a life of dignity is a cornerstone of governance. This promise manifests itself in the increased usage of LPG cylinders under the Ujjwala Yojana which has saved crores of women from chronic respiratory disorders through smoke-free kitchens. With the success of Swachh Bharat Abhiyan, crores of women are now able to access toilets in their homes without any fear of safety or violation of dignity. Walking long distances to fetch water for daily usage is a thing of past as households across the county are getting tap water connections under the Jal Jeevan Mission which has ended this ordeal.

Women empowerment without economic empowerment of women is meaningless. For

instance, 68% of MUDRA loans or 35.38 crore loans of Rs. 14.72 lakh crore given to women entrepreneurs enabling crores of women across the country to pursue micro-level entrepreneurship and become financially independent. To promote financial inclusion among women, Mahila Samman Savings Certificate was introduced as part of the Union Budget 2023-24, which is a small savings scheme exclusively for female investors.

Under PM Awas Yojana, women are being made owners of the family home thus becoming active participants in household decision-making.

In the 11 years of the Modi government, women have grown from strength to strength. Their success can be seen in the significant increase in the numbers of female police personnel, in the laurels won by sportswomen for the country, and in the enrolment of women in the fields of Science, Technology, Engineering & Maths. Now women are the real partners in development instead of earlier eras in which the schemes were just launched as eyewash for them. Today it is no longer women development, but women-led development.

AT A GLANCE

For the first time in India,
1,020
women per 1,000 men (NFHS-5)

Paid maternity leave
increased from 12 weeks to
26 weeks

6+ crore
free antenatal check-ups conducted under
PM Surakshit Matritva Abhiyan

₹18,593 crore disbursed to
3.98 crore
Pregnant women and Lactating Mothers under PMMVY

77+ crore
sanitary pads ensured at ₹1 in
Jan Aushadhi Kendras

4.2 crore
Sukanya Samriddhi Yojana accounts

Over
10.33 crore
smoke-free kitchens

73 %
of nearly 2.75 crore
PM Awas-Gramin beneficiaries are women

10 crore
Women have been mobilized into over **90 lakh Self Help Groups (SHGs)**

35.38 crore (68%) of MUDRA loans worth
₹14.72 lakh crore given to women

Maternal Mortality Rate
has declined to 80 in 2023

Pledge to make
3 crore women
Lakhpati Didi

POINTS TO REMEMBER

Why women support PM Modi - Social transformation for women empowerment

- Proposal to raise **marriageable age of women** from 18 years to 21 years helps with education and employment.
- **Law against Triple Talaq** protects Muslim women from exploitation.
- **Increase in paid maternity leave** period from 12 weeks to 26 weeks makes work-life balance possible for working women.
- **Scrapping of Article 35A** has given rights to women in J&K that were historically denied.

* * *

Removing drudgery from the daily life of women In rural or semi-urban areas, even getting basic necessities used to be a battle for women. Not anymore.

<p>Women walked long distances to lakes, ponds or borewells and brought back heavy loads of water.</p> <p>Women inhaled smoke from wood-fired kitchens. They went out to collect firewood for cooking.</p> <p>Women had to go to isolated places to relieve themselves, endangering their health, safety and dignity.</p> <p>Kerosene lamps harmed respiratory health and eyesight of people in poor families, especially women and children.</p>	<p>THEN NOW</p>	<p>Over 15.6 crore tap water connections.</p> <p>Ujjwala Yojana's 10.33+ crore LPG connections freed women from respiratory diseases.</p> <p>Swachh Bharat's 12 crore toilets have removed these worries. Income generation opportunities through non-biodegradable waste management set-ups.</p> <p>100 % willing household electrification under Saubhagya Yojana.</p>

OVERVIEW

Prime Minister Narendra Modi has famously said, “The world has admitted that India has two limitless powers—demography & democracy.” India currently has the world’s largest young population, and the government under Prime Minister Modi is committed to harnessing its potential to the fullest.

The National Education Policy (NEP) of 2020 overhauled the existing education system after over thirty years. NEP envisions a paradigm shift in the Indian school and higher education system that is rooted in Indian ethos, is more learner-centric, and aims to make India a global knowledge superpower. In the last 11 years alone, a record number of new IITs, IIMs, medical colleges, and universities have been opened across the country. Along with education, skilling, and upskilling have also been the focus of the Modi government.

Since its launch, more than 1.6 crore youngsters have received skill training under the PM Kaushal Vikas Yojana, thereby improving their employment prospects.

The success of the Modi government’s prioritization of creating new formal jobs for the youth can be seen in the massive rise in new Employee Provident Fund Organisation accounts. Consistent efforts

to transform India into an attractive investment hub, assisting MSMEs and programs such as the Production Linked Incentive Scheme for domestic production have contributed towards creating employment opportunities for young Indians.

Rozgar Mela, a recruitment drive for 10 lakh Central government jobs, has been launched by the government. The youth are also being given an opportunity to serve in the Armed Forces under the Agnipath scheme. It will instill a fresh lease of ‘Josh’ and ‘Jazba’ in the Armed Forces, while at the same time bringing about a transformational shift towards a more tech-savvy force. The focus has not been just to create employment but also to build entrepreneurship, transforming the youth from job seekers to job creators.

Unlike earlier when people were risk-averse and opted for salaried jobs, the youth today is becoming enterprising because of the conducive policy environment. Through the Startup India programme that was launched in 2016, the Modi government has taken numerous measures to promote entrepreneurship by providing a host of tax benefits, easing regulations, and reducing the compliance burden.

Like entrepreneurship, sports was considered a distraction

for most young people, and they were discouraged from pursuing it professionally. However, PM Modi brought a crucial behavioural and mindset change and introduced various policies that have allowed innumerable youngsters to fulfil their dream of pursuing sports as a career. India saw its best-ever performance in history during the Tokyo Olympics and Paralympics in 2021. This has been an outcome of long-term planning and support through the flagship Target Olympic Podium Scheme.

As India enters Amrit Kaal, its demographic dividend is uniquely poised to usher in an era of rapid social, economic, and technological innovation and advancement. The government in the last 11 years has been fully committed to supporting the youth in all its goals and endeavours.

POINTS TO REMEMBER

Indian youth: from job seekers to job creators

- PM Modi is changing societal mindset and creating wider **acceptance for risk takers**.
- Self-employment and entrepreneurship are becoming popular occupational choices.
- Various schemes are aimed at giving **institutional support to entrepreneurs**.

Fit India Movement – Fitness is Freedom

- Nationwide campaign inspiring citizens to adopt healthier lifestyles through regular exercise, balanced diets, and active routines to promote physical and mental well-being.

Remarkable Achievements in Indian sports

- India won the highest

ever medal tally in its history in Tokyo Olympics 2020 and Paris Paralympics 2024.

- Long-term planning since 2014 led to this record success.
- Extensive support to sportspersons through **TOPS** programme.
- Khelo India is **making sports a mass movement** and building a sporting culture across India.

Ensuring jobs for young India

- Robust economic policies are creating lakhs of new employment opportunities annually.
- India's total exports reached a record USD 824.9 billion in 2024–25. This marks a significant leap from USD 466.22 billion in 2013–14, reflecting sustained growth over the past

decade.

- **1.60 crore people skilled** under PM Kaushal Vikas Yojana, improving employment prospects.
- **8.59 crore new EPFO subscribers added** between September 2017 and February 2025 - each is one formal job!
- 1.09 crore new EPFO accounts added in 2021-22, **despite the pandemic**.
- Most surveys indicate robust hiring sentiment and **lesser unemployment than pre-pandemic years!**
- **MUDRA Yojana** supported crores of new entrepreneurs and created jobs.
- **4.8 lakh+ direct jobs** created by **DPIIT** recognised tech start-ups in 2017-24.

* * *

Did you know?

Direct Job Indicators

- Over 3.45 crore youth between ages of 18-28 years added to EPFO since April 2020.
- Naukri Job Speak Index - a key barometer of white-collar hiring - stood at 2,878 points in April 2025, registering 39% growth from April 2021.
- Promoting skilling, re-skilling, and upskilling in Capital Goods sector by creating 40 Qualification packs (QPs) for skill levels 6 and above by the Sector Skill Council.
- CEFC under WRI Trichy has trained a total of 8,143 individuals till date in various welding technologies through its training centres at Trichy, Ranipet, Haridwar, Bhopal, Jhansi and Varanasi.

Indirect Job Indicators

- India's total exports reached a record USD 824.9 billion in 2024-25.
- Engineering exports increased From \$73 Billion in 2014-15 to \$117 billion in FY 2024-25.
- Exports in Readymade garments of all textiles showed a growth of 10% in 2024-25.

EASE OF LIVING FOR MIDDLE CLASS

5

OVERVIEW

The benchmark of a dignified standard of living is to own a house with basic amenities such as tap water, cooking fuel, sanitation, electricity, and internet along with financial security through insurance, tax benefits, and easy access to public utilities. Since 2014, Prime Minister Narendra Modi's government has worked tirelessly to improve the quality of life of every Indian.

The Modi government in its endeavour to provide dignified life to all Indians has turned their dream of owning a house into a reality. The Modi government through its welfare programmes has ensured that citizens across all segments of society have access to basic facilities like banking, LPG connections, sanitation, electricity, tap water, affordable healthcare, and quality education. A reduction in interest rates and the Modi government's Credit Linked Subsidy Scheme under PM Awas Yojana has enabled people to buy their first home. Alongside this, strengthening the regulatory framework through steps such as the enactment of the Real Estate Regulatory Authority (RERA) Act 2016 has ensured that the lifetime earnings of citizens are protected by a legal framework that upholds the rights of homebuyers.

The Svamitva Scheme is a reformative step towards the establishment of clear ownership

of property in rural inhabited areas. It entails mapping land parcels using drone technology and providing a 'Record of Rights' to village household owners with the issuance of legal ownership cards (Property cards/Title deeds) to the property owners.

Lower taxation and affordable borrowing rates have led to massive savings for middle-class households and expanded their disposable income. Positive changes in income tax exemptions and direct tax reforms have reduced their tax burden and made tax filing simpler for the middle class. The Goods and Services Tax has led to a decline in a wide range of everyday expenses for consumers.

The Ude Desh Ka Aam Nagrik (UDAN) scheme, now in its sixth year, has made air travel affordable and convenient for the common man. It has provided air connectivity to numerous tier 2 and tier 3 cities and ensured that air travel is accessible to all. The number of operational airports in the country have doubled since 2014.

To ease transportation and daily commute for the urban citizen, a record number of metro rail projects have been approved and commissioned across several cities. Citizens are now shifting from private vehicles to public

transportation and making considerable savings without compromising on comfort.

The Digital Payment revolution unfolding in India has attracted global attention. In March 2025, approx. ₹24.77 lakh crore worth of 1830.151 crore UPI transactions were carried out on the Unified Payment Interface (UPI). The (UPI) system is now used by close to 460 million individuals and 65 million merchants. Digital payments are being made for even the smallest of transactions, with nearly 50 per cent classified as small or micropayments.

Taking India's digital transformation and connectivity to new heights, 5G has been rolled out in 99.6% districts of the country in 22 months, making it one of the fastest rollouts. It unlocks huge possibilities for India with high-tech technology and paves way to bring transformation in crucial areas including agriculture, health, education, transport, smart cities, Industry, financial inclusion, etc.

The government through various measures in the last 11 years has focused on improving the daily life of its citizens. This momentum to improve quality of life for all Indians is in line with the larger vision of the Prime Minister of "Sabka Saath, Sabka Vikas, Sabka Vishwas, Sabka Prayas."

POINTS TO REMEMBER

Taxes are no more a worry because...

- **E-filing** has become the norm.
- **Refunds** arrive in a matter of days, not months.
- Faceless assessments and appeals **reduce harassment**.
- Tax rates have actually **reduced!**

A trusted government, a trusting government

- Modi government has created an **atmosphere of mutual trust**.
- By taking steps like enabling **self-attestation**, the government has shown it trusts citizens.

- The increase in number of IT returns from 3.3 crore for FY13-14 to 8.09 crore for FY23-24 shows that the people trust the government to use their taxes appropriately/wisely.

Owning a house within everyone's reach, whether poor or middle class

- **For the poor**, there is PM Awas Yojana in both rural and urban areas
- **92.6 Lakh** houses completed between 2015-25 under **PM Awas Yojana** and **PM Awas Yojana 2.0** in urban areas
- **RERA** ensures timely delivery of homes,

so that the money of homebuyers is not stuck.

'Ease of Travel' and improved connectivity

- Expansion of metro rail is making local travel in cities much easier for urban residents.
- **UDAN** scheme has enabled affordable air travel and connectivity to many tier 2 and tier 3 cities.
- Car loan interest rates have fallen since 2014.

AFFORDABLE, ACCESSIBLE HEALTHCARE FOR ALL

6

OVERVIEW

Health and wellness have been a key focus area for the Narendra Modi government during the last eleven years. This has been the key element in India emerging victorious from a global pandemic, by administering over 220 crore doses of vaccines, as well as exporting a significant number of vaccines to the world in time of need.

Accessible and affordable quality healthcare, a priority for the government, has turned into a reality for the citizens of India. Previously, medical expenditure used to be a severe economic burden for low-income households and often led them into debt traps. In 2018, the Modi government launched Ayushman Bharat- Pradhan Mantri Jan Arogya Yojana, the world's largest health assurance programme, thus giving permanent relief from this burden to nearly 55 crore beneficiaries. Further, the Ayushman Bharat Digital Mission (ABDM) is realising the vision of building a digitally connected healthcare ecosystem.

Over 54 crore health records of individuals have been linked to their Ayushman Bharat Health Accounts (ABHA). The digitally available health records will enable the ABHA holders in availing paperless health services across the ABDM network. The government's telemedicine programme – eSanjeevani is bringing a revolution in the health sector of the country. Through it more than 37.15 crore beneficiaries have been able to access quality healthcare at their doorstep, thus bridging the urban-rural barrier in the provision of specialist medical care. 16000+ Jan Aushadhi

Kendras, located in almost all districts, are providing quality generic medicines at affordable prices to all.

The government has been committed to avoiding any suffering from vaccine-preventable diseases. In this regard, under various phases of Mission Indradhanush, 5.46 Crore Children and 1.32 Crore Pregnant Women have been vaccinated against 12 diseases. Due to this targeted government initiative, there has been a significant decline in Maternal Mortality Rate in the country from 130 in 2014-16 to 80 per lakh live births in 2020.

The Modi government has brought a crucial turnaround in medical education. Few government colleges, high fees in private medical colleges, and massive corruption in seat allocation had severely limited opportunities for medical education. In the last 11 years, the Modi government has approved/established new AIIMS in several States, and large number of new medical colleges. These include the first ever AIIMS in the Northeast in Assam. Further, the government's bold decision to replace the Medical Council of India with the National Medical Commission has ended corruption in medical education. In 'New India', talented students from humble backgrounds can also fulfill their dream of becoming a doctor. India's quick and effective response to the Covid-19 pandemic was supported by its rollout of the world's largest vaccination drive and that too using indigenously developed vaccines. In a landmark shift

from the past, when the citizens had to wait for decades for the start of vaccination drives, PM Modi led government ensured administration of more than 2.2 billion doses of Covid vaccine in a short span of two years.

In the last 11 years, India has made huge strides in healthcare. A government that invests in healthcare invests in its people and thus the Narendra Modi-led government has truly been a government of the people, for the people, and by the people.

POINTS TO REMEMBER

Ahead of the curve, due to proactive leadership

- At a time when many world leaders failed to even recognise COVID-19 as a threat, even before India had a single case, **screening began in airports.**
- Long before many other countries took it seriously, in the first week of March 2020, **PM Modi said he would avoid gatherings** such as Holi Milan and set an example.
- Mask mandates were enacted in large parts of India **long before the WHO** called for them.
- At a time when many countries were only thinking of massive mortalities, in April 2020, India had already **set up a vaccine task force** to save lives.
- India started using Rapid Antigen Tests to speed up testing long before WHO recommended it.
- The fact that India went

into an **early lockdown** has been universally acknowledged. This helped ramp up medical infra.

Future-proofing India with PM-ABHIM

- PM – Ayushman Bharat Health Infrastructure Mission to invest **₹64,180 crore** on health infrastructure.
- Support for **17,788 rural health and wellness centres** in 10 high-focus states.
- Establishing **11,024 urban health and wellness centres** in all states.
- **3,382 block public health units** in 11 high-focus states.
- Setting up **integrated public health labs** in all districts.
- Establishing **critical care hospital blocks** in all districts with a population of more than 5 lakh.

Digital is the way – ABDHM

- With the success of CoWIN and Aarogya Setu, the **power of tech in healthcare** has been seen.
- Ayushman Bharat Digital Health Mission (ABDHM) is creating a seamless online platform for healthcare.
- Citizens create their ABHA (Ayushman Bharat Health Account) numbers, to which their **digital health records are linked.**
- With the citizen's consent, this data can be accessed by healthcare professionals.
- ABDM facilitates **evidence-based decision making** for effective health interventions.
- **77 crore ABHAs** have been created so far!

”

NATION FIRST: NATIONAL SECURITY & FOREIGN POLICY

7

OVERVIEW

Over the past eleven years, the Narendra Modi-led government has envisioned and executed a dynamic and transformative foreign policy that is outcome-oriented, development-focused, and aligned with the government's vision of "Sabka Saath, Sabka Vikas, Sabka Vishwas, and Sabka Prayas."

The primary focus of India's foreign policy remains its immediate neighborhood, under the 'Neighborhood First Policy.' This is further strengthened by the revitalized 'Act East,' 'Think West,' and 'Connect Central Asia' policies, aimed at enhancing India's engagement with its extended neighborhood. The government's vision of 'Security and Growth for All in the Region' (SAGAR) is designed to strengthen ties with like-minded partners to promote a rule-based order across the Indo-Pacific region.

New initiatives such as the International Solar Alliance (ISA), the Coalition for Disaster Resilient Infrastructure (CDRI), Lifestyle for Environment (LiFE), and the International Big Cat Alliance (IBCA) have strengthened our multilateral relations with the world. In keeping with the government's goal to expand India's global footprint around the world, proactive actions have also been taken to increase the number of missions, consulates, and representative offices. India took over the G-20 Presidency on December 1, 2022. The theme for India's Presidency, "Vasudhaiva Kutumbakam" or "One Earth-One Family-One Future," is a uniquely Indian concept that has been widely appreciated. More than 200

meetings held in 60 cities created an unprecedented atmosphere for the G20 event. As a result, India's G20 presidency was truly people-centric and emerged as a national effort.

Through the use of e-governance tools, India's consular operations have been made amongst the fastest, most transparent, and user-friendly globally. India has signed Social Security Agreements to protect the interests of Indian workers abroad, agreements to enhance mutual mobility of students, professionals, and agreements with several nations to prevent illegal migration.

India continues to play a pivotal role as the 'First Responder' during times of humanitarian crises. The setting up of the Rapid Response Cell as a specialized division in the Ministry of External Affairs to coordinate efforts during humanitarian crises has made disaster protocols more resilient. India has taken up several major relief and evacuation operations during the last 11 years such as Operation Dost (2023), Operation Ganga (2022), Operation Devi Shakti (2021), and Mission Sagar (2020), to name a few.

National security has remained a top priority for the Modi government. This can be seen in rescue operations conducted outside India, adopting zero-tolerance against terror policy at home, as well as significant reduction in left-wing extremism. India's assertion on the global stage has also undergone a remarkable evolution. The success of **Operation SINDOOR** demonstrated a new India—

resolute, swift, and sovereign in action.

The Prime Minister's strong belief that development and national security go hand in hand has fueled the push for Aatmanirbharta (self-reliance) in defence. India's first indigenous aircraft carrier, INS Vikrant, showcases the country's growing prowess for indigenous manufacturing. Defence exports reached an all-time high of ₹23,622 crore in the financial year 2024-25. To foster innovation and technological advancement, the Innovation for Defence Excellence (iDEX) framework was launched, which has played a pivotal role in supporting start-ups and innovators for successful prototype development.

A dynamic foreign policy and national security policy is essential to respond to the opportunities and challenges of the world today. The Modi government has consistently delivered on this front, ensuring a stable, strong, and safe nation.

POINTS TO REMEMBER

Zero-tolerance to terrorism

- **No major terrorist attack** in Indian cities in non-conflict zones since 2014.
- Appropriate response to cross-border terrorism through **Surgical Strikes in 2016, Air Strikes in 2019** and **Operation Sindoor in 2025**.
- Sponsors of terror have been **globally isolated** and cut to size.
- India has made **terrorism a global issue** and is leading global discussions on this issue.
- Strengthening legal framework through **UAPA** amendment.
- **What is a positive indigenisation list and**

why does it matter?

- Our positive Indigenisation lists of over 5000 items comprising major equipments have been issued.
- These lists contain a **roadmap of those weapons, arms and systems that India will not import** in future. 5 separate lists of over 4600 items for DPSUs have been notified.
- Knowing such a roadmap and mandate for domestic procurement helps domestic manufacturers ramp up production.
- This boosts India strategically and at the same time, creates jobs

for youth.

Investment for Aatmanirbhar defence sector

- **FDI limit in defence raised** to 74% through automatic route.
- In Budget 2025-26, **75% of the capital procurement** budget for Defence is for domestic industry.
- Incentives for **defence corridors** in Uttar Pradesh and Tamil Nadu.
- Defence corridor in Bundelkhand of Uttar Pradesh will transform the poor region into a powerhouse.

* * *

Freedom of Indian justice system from colonial era laws

Bharatiya Nyaya Sanhita, 2023, Bharatiya Nagarik Suraksha Sanhita, 2023, and Bharatiya Sakshya Adhinyam, 2023 - these 3 Acts ensure enhanced protection for the poor, marginalised and vulnerable sections with special focus on women and children. They bring our legal, policing, and investigative systems into the modern era with a focus on technology and forensic science. At the same time, these Acts come down heavily on organised crime, terrorism and such offences which strike at the root of our peaceful journey to progress.

There is unprecedented trust for India in this decade and the next 25 years. India will achieve its goals faster with everyone's efforts.

- Narendra Modi

INDIA, A GLOBAL ECONOMIC POWERHOUSE

8

OVERVIEW

The past few years have been challenging for the global economy as it recovers from the aftermath of the Covid-19 pandemic and the Russia-Ukraine conflict. As the world struggles to find its feet, the Indian economy continues to break new ground. In its latest projections on world economic growth, IMF recognizes India as the fastest-growing major economy in the world.

The substantial growth in GST collections, increased capital spending, and unparalleled export performance demonstrate a vibrant and resilient economy that has successfully recovered from the pandemic.

This has been possible due to the Modi government's holistic approach to managing the economic fallout of the pandemic, and also the steadfast efforts since 2014 to strengthen the economy. The structural reforms initiated by the Modi government have strengthened the Indian economy and enabled it to withstand the unprecedented effects of the pandemic. To make India self-reliant in manufacturing, the Modi government has initiated several programs under Aatmanirbhar Bharat as well as Make in India. This sector received further impetus

with the Production Linked Incentive (PLI) scheme. The objective behind PLI is to make domestic manufacturing globally competitive and to create domestic leaders in manufacturing. The PLI Schemes have created lakhs of jobs and placed the Indian economy on a rapid growth trajectory. From a net importer earlier, India has become a global manufacturing hub for mobile phones. The production of mobile phones increased by 5 times from about 60 million in 2014-15 to approximately 330 million in 2023-24.

The Modi government has made MSMEs a central focus of its economic policy. The government's Emergency Credit Line Guarantee Scheme during the Covid pandemic protected more than one crore MSMEs and saved them from possible permanent closure. Moreover, reforms such as revision of MSME definition have allowed MSMEs to expand their operations and grow.

PM Modi has consistently assured the country's wealth creators adequate support in their efforts towards innovation and making India self-reliant. This is reflected in his personal focus and support for the Indian Semiconductor Mission (ISM) and its vision of building a semiconductor

and display manufacturing ecosystem in India.

India has also emerged as a preferred investment hub under Prime Minister Modi's dynamic leadership. Consistent reforms such as GST, IBC, in the FDI regime, ease of doing business, compliance reduction and signing multiple FTAs has resulted in consistent increase in both FII and FDI investments. Post COVID exports have touched new highs every year.

Over the past eleven years, the Indian economy has undergone a significant transformation, positively influencing the standard of living across all segments of society.

* * *

AT A GLANCE

India is projected to be **world's fastest growing major economy** (6.3% to 6.8% in 2025-26)

49% of global real-time digital transactions happened in India (ACI Worldwide Report 2024)

₹29.8 lakh crore Aatmanirbhar Bharat Package during COVID saved economy

Gross FDI inflows hits **USD 1 Trillion*** in Sept 2024

India's **non-petroleum exports** reached an all-time high of **USD 374.1 billion** (FY 2024-25)

PLI Scheme clocks Investment of **₹1.61 lakh crore**, Production of **₹14 lakh crore**, Exports of **₹5.31 lakh crore** and **11.5 lakh Jobs**

* Since April 2020

POINTS TO REMEMBER

World's fastest growing major economy – why growth is not just a number

- There is a global consensus that India will remain the **world's fastest growing** major economy.
- High growth will lead to **greater resources** for the government and allow further expansion of welfare schemes and infrastructure projects.
- High growth leads to the creation of **new employment opportunities**.
- New opportunities lead to a steady rise in incomes and **distribution of benefits of growth** to every section of society.

Aatmanirbhar Bharat: turning adversity into opportunity

- Robust economic management by PM Modi

since the pandemic started has **turned adversity into opportunity**.

- All economic indicators pointing towards India's economic resurgence.
- From MSMEs to MNCs, all firms have witnessed expansion in output and contributed to a **historic rise in services, manufacturing and exports**.
- Hiring sentiment at an all-time high in many sectors, **ensuring growth converts to jobs**.

Reforms by conviction and consensus

- PM Modi has started a new trend of reforms by conviction and consensus by personally pushing **many structural reforms** at a difficult stage.
- Cooperative federalism means the **Centre is**

encouraging states to voluntarily undertake reforms, by incentivising them.

- Reforms have protected the interests of all stakeholders.

Building a better economy

- Introduction of Goods and Services Tax (GST) has led to **greater formalisation**.
- **Sharp decline in NPAs** and economic offences due to strict action by the government for recovering dues.
- IBC has salvaged the situation for the Indian banking and corporate sectors.
- India is rapidly transforming into a **'Digital Economy'**.

* * *

Creating a base for 'Growthade'

- Indian corporates raised an all-time high of ₹1,62,387 crore through IPOs in 2024-25.
- National highways increased from 91,287 km in 2014 to 1,46,204 km till March 2025
- There are 160 operational airports in the country, which include 145 airports, 02 Water aerodromes and 13 Heliports as of March 2025.
- Extension for availing 15% tax rate for new manufacturing units till 2024, and tax incentives by a year for start-ups, will give a boost to sectors that have flourished in the last few years and created jobs
- Scheduled Commercial Banks (SCBs) gross non-performing assets (GNPA) ratio fell to a 12 year low of 2.6% in December 2024

MILESTONES

India is projected to be **world's fastest growing major economy** (6.3% to 6.8% in 2025-26) (As per Economic Survey 2024-25)

GLOBAL CONSENSUS ON INDIA'S RAPID GROWTH

India to be the fastest growing major economy as per various global institutions.

TAX COLLECTIONS SIGNAL A STRONG ECONOMIC REVIVAL

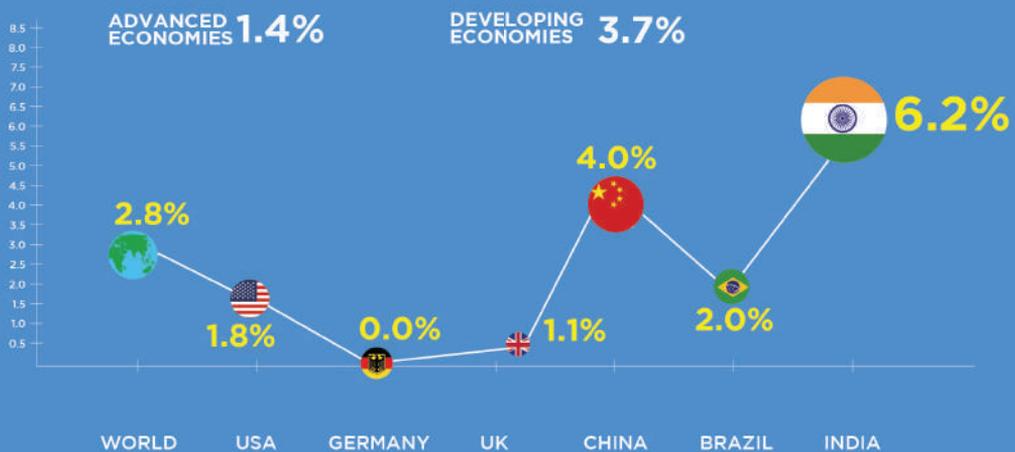

All time high monthly GST collection in April 2025

Gross Tax revenue-GDP Ratio is 11.9% for FY25 and is estimated to be 12% for FY26 (As per the Union Budget 2025-26)

Tax Simplification

Corporate Tax structure Rationalized and Simplified

GROWTH FORECAST BY IMF'S WORLD ECONOMIC OUTLOOK FOR 2025

“

There was a time when it was asked- Why India? Now after looking at the impact of the reforms that have taken place in the country, it is being asked - 'Why not India?'

- Narendra Modi

”

EASE OF DOING BUSINESS

9

OVERVIEW

Today the world is looking at India as an attractive destination for investment and global companies want to establish businesses here. There is wholesome appreciation for Prime Minister Narendra Modi's thrust for transformative governance and economic reforms to enhance the Ease of Doing Business in India. One of the most striking indicators of the country's improved business environment is the growth of its startup ecosystem. One of the greatest examples of improvement in the business climate of the country can be seen in its startups. Before 2014, India had a few hundred Startups. More than 1,60,000+ Recognized startups have been added, creating 17.6 lakh+ jobs in last 11 years. Moreover, India is the 3rd largest start-up ecosystem in the world.

Since 2014, rent-seeking and red-tapism have been replaced by a red carpet. The government is not an obstacle in the path of risk-takers but is an active enabler. Entrepreneurs and investors in India are now delighted by a business-friendly environment and a government that actively addresses their concerns and redresses grievances. This paradigm shift has been made possible through landmark decisions such as removing retrospective taxation, and Angel Tax, and lowering corporate tax. The

National Single Window System now allows obtaining all approvals through a single platform. Moreover, the Modi government has reduced unnecessary compliance burden by repealing more than 1,500 archaic laws and thousands of compliances. These used to create unnecessary costs and hurdles for Indian enterprises.

The Prime Minister's mantra of transparency and reduced compliance requirements proves that the government trusts its citizens. This trust is reflected in the increasing number of taxpayers and record tax collections. Similarly, increasing self-regulation, self-certification, automated random labour inspections, and faceless tax assessment/appeal has not only weakened the 'Inspector Raj' but also enhanced compliance.

India's efforts to improve the ease of doing business are being acknowledged on the global stage. This is evident in consistent improvement in various international rankings. For instance, the country's ranking in the World Bank's Ease of Doing Business Index climbed from 142 in 2014 to 63 in 2019. India has climbed six places on the World Bank's Logistic Performance Index (LPI) 2023, now ranking 38th in the 139 countries index.

This is a strong indicator of India's global positioning, with this development being powered by the Government's laser focus on reforms for improving logistics infrastructure through initiatives like PM Gati Shakti and new National Logistics Policy.

The thrust towards greater transparency & a level-playing field for MSMEs and small businesses is exemplified by the success of the GeM portal, the government purchases have crossed ₹5 lakh crore.

Apart from numerous reforms and landmark decisions, Prime Minister Narendra Modi has successfully led a mindset transformation. Unlike previous governments, the Modi government not only considers entrepreneurs as wealth creators but also as partners in national development. Concerted efforts to improve the Ease of Doing Business have led to a historic expansion in the pool of wealth creators. This has had a butterfly effect on the country at large- it has increased resources available to the government for its welfare and development programmes, while at the same time enabling job creation, and higher incomes in the country.

POINTS TO REMEMBER

Painless, faceless, seamless tax system

- Tax rates are not a pain anymore. India has one of the **lowest corporate tax rates of 15%** for new domestic manufacturing companies.
- For existing companies, the government **reduced corporate tax rates from 30% to 22%**.
- Retrospective tax adversely affected India's image among global investors and has accordingly been scrapped. Similarly **angel tax has also been scrapped**.
- Most tax processing and assessments happen online, which makes filing returns, assessments, appeals and

refunds **seamless and quick**.

- **Faceless assessment and appeals** remove chances of harassment, reducing inspector raj.

From red-tapism to red carpet

- Various economic reforms and incentives have made India the most **preferred destination for investment**.
- **Single window system** is available for approvals and clearances, reducing hassles.
- The number of documents needed for company incorporation has been reduced.
- **FDI rules have been liberalised** in many

sectors and hence, FDI has broken all records in the past few years.

Trust in industry and entrepreneurs

- The '**Growth Ambassadors**' of India, our entrepreneurs are powering India's growth story by creating jobs.
- A new mindset of trust has been created where the government and citizens trust each other.
- **Self-regulation and Self-compliance are the norm**.
- **Ending 'Inspector Raj'**, reforms in labour inspection processes and environmental laws have curbed rent seeking and corruption.

INFRA AT SPEED AND SCALE

10

OVERVIEW

The quality of a country's infrastructure is a key determinant in shaping its economic trajectory. Quality infrastructure is the key building block for our nation to become a global economic powerhouse. Keeping this in mind, the Narendra Modi-led government has kept infrastructure at the front and centre of its development agenda.

In the past, infrastructure projects suffered from inordinate delays. But in the last eleven years, thinking big and delivering without delay have been the hallmarks of infrastructure development in the country. The Prime Minister has regularly monitored the progress of projects through the PRAGATI platform, which has led to the successful completion of various delayed, as well as newly announced infrastructure projects.

In line with its goal of bringing last-mile connectivity, the daily average highway construction reached an all-time high and has consistently remained far higher than pre-2014 levels. Similarly, a rapid increase in the construction of rural roads has made access to

roads nearly universal in the hinterland. Indian railways also witnessed a massive capacity expansion in the last 11 years through line doubling and electrification of railway tracks. The Vande Bharat Express, India's first indigenous Semi High-Speed trains are a 'Make in India' success story.

As for air travel, the steps taken by the Modi government, have made it affordable and accessible. 86 airports have been built and operationalised in just 11 years. Further, 88 underserved/unserved destinations which include 73 Airports, 13 Heliports & 2 Water Aerodromes have been connected under the UDAN scheme.

Like airports, metro rail also is no longer limited to big cities. In the last 11 years, metro rail projects have reached 23 cities.

To further enhance infrastructural linkages, and reduce costs for citizens, the recently launched National Logistics Policy aims to bring down logistics costs, give a fillip to international trade, present new opportunities to our startups, businesses, and farmers, and usher in prosperity in the nation.

Infrastructure development in a country has to be supported by strong financial commitments. In line with this, Prime Minister Narendra Modi announced the PM Gati Shakti National Master Plan (NMP) which is a transformative approach for integrated and holistic planning across concerned Ministries/Departments to improve multimodal connectivity, logistics efficiency and to address critical infrastructure gaps for seamless movement of people and goods, with focus on minimising disruptions and ensuring timely completion of projects. It is the most extensive plan for infrastructure development in the history of independent India, as the government plans to invest nearly ₹100 lakh crore in the coming years.

Prime Minister Narendra Modi's vision for infrastructure development will support India's economic growth to the next level. It will enhance the ease of living for citizens, multiply job creation and achieve the last mile connectivity to bring about inclusive development.

INDIA'S TECHADE

11

OVERVIEW

The Modi government has shown an unwavering commitment to use technology for inclusive development and to promote ease of living. The government is working at democratising technology and bringing rapid digitalisation of governance.

A remarkable success story is evident in the popular adoption of digital payments in the country. In March of 2025, about 18,301.51Mn (1830 crore) transactions worth ₹24.77 lakh crores approximately were carried out on the United Payment Interface. India's digital payment system has been linked to various countries globally. Aadhaar e-KYC services also continue to play a stellar role for banking and non-banking financial services by providing transparent and improved customer experience, and helping in ease of doing business. India today has amongst the highest fintech adoption rates in the world.

In the last eleven years, there has been a meteoric rise in mobile ownership across India. The sharp decline in the cost of data has led to deep penetration of the internet, bridging the urban-rural divide. With 5G rollout in 99.6% districts of India, the country will witness the next wave of digital transformation

and connectivity. Under the Bharat Net project, more than 2.14 lakh of the 2,50,000 Gram Panchayats in the country have already been provided with Broadband connectivity.

Technology adoption by the government over the last eleven years has ensured a remarkable increase in transparency in governance. Today, all government programmes have a digital dashboard that provides all details of beneficiaries. Digital delivery of public services is eliminating corruption and promoting ease of living.

Digital delivery of vaccines through the CoWIN platform allowed India to ensure equity and accessibility in vaccine distribution. Other countries are now looking towards India for providing technology solutions such as the CoWIN platform.

The Modi government has effectively deployed technology and digital tools for ensuring transparency and plugging leakages in governance. For example, the introduction of Direct Benefits Transfer and Aadhar authentication in various welfare schemes have led to the elimination of lakhs of ghost beneficiaries, enormous savings for the government, and timely delivery of benefits

to citizens. Between 2015 and March 2023, the government saved more than ₹3.48 lakh crore due to the distribution of benefits through DBT.

Even public procurement, a common avenue for bureaucratic corruption earlier, has now become digital as the Government e-Marketplace (GeM) portal is being utilized by government departments and PSUs for their procurement. The portal is successfully eliminating corruption and streamlining public procurement in the country.

In the last 11 years, India's space programme has grown from strength to strength. While its various Missions are talked about widely with the recent launch of Vikram-S, India's first-ever private launch vehicle, India is now ready to enter a new decade of further innovation, and advancement in this sector.

India's foray into the vast expanse of space has been nothing short of remarkable, capturing the imagination of the world and showcasing the nation's commitment to scientific exploration and technological innovation. The Indian Space Research Organisation has steadily evolved into a global space powerhouse with the objective of enhancing the overall progress of India through the most effective and efficient utilisation of space sector applications.

This transformation has been made possible through unwavering government support that has consistently nurtured and propelled India's space missions to new heights.

Under the visionary leadership of Prime Minister Narendra Modi, the importance of space exploration as a catalyst for national development has been recognized. His trust with the space sector began when he was the Chief Minister of Gujarat. His vision ensured that space sector applications were translated into solutions for effective governance. The same technology is being leveraged in PM Gati Shakti, where space technology is extensively used for planning and executing infrastructure projects seamlessly. Only visionary leaders can understand that space technology and exploration are keys to unlocking mysteries in space and accelerating effective governance on Earth.

"India is on the Moon. We have our national pride placed on the Moon. We reached the spot where no one had ever reached before. We did what no one had ever done before. This is today's India, fearless India, warrior India."

- Prime Minister Narendra Modi, 23rd August 2023

PM Modi highlighted that, India's successful moon mission is not India's alone, it is India's human-centric approach that has been welcomed universally and our moon mission is also based on the same human-centric approach and hence this success belongs to all of humanity.

PM Modi is confident that all countries in the world, including those from the Global South, are capable of achieving such feats and like India all can aspire for the moon and beyond.

NORTHEAST: A GROWTH ENGINE

12

OVERVIEW

The Narendra Modi-led government has always prioritized inclusive development, and the government's Northeast policy reflects its push to bring the region into the mainstream.

This policy emphasises not only economic growth and internal security but also the protection and celebration of the region's unique cultural identity.

Over the last 11 years, Delhi itself has reached the doorstep of the Northeast through regular visits by the Prime Minister, his ministerial colleagues, and senior bureaucrats. The Prime Minister has himself become an ambassador of the Northeast culture for the rest of the country and the world.

In the last 11 years, significant investment has been made in the Northeast for its economic development. Several projects have been completed during the last 11 years. 974 industrial units registered under Northeast Special Infrastructure Development Scheme (NESIDS). ₹1010.99 Crore disbursed till 31.03.2025; ₹400 Crore disbursed alone in 2024-25 for developmental packages in the Northeastern Region. The Prime Minister's Development Initiative for Northeast Region (PM-DevINE) announced as part of the Union Budget 2022-23, aims at rapid and holistic development of the region

by funding projects of significant impact.

Lack of physical connectivity and poor infrastructure had contributed to the region's isolation for many decades. Innumerable long-pending infrastructure projects were completed. The long list of projects includes iconic projects such as Bogibeel Bridge, inaugurated by PM Modi in 2018, sixteen years after its announcement by PM Atal Bihari Vajpayee, expansion of the railway network, the trial run of passenger train has been conducted in Mizoram first time since independence. The government has also focused on operationalizing new airports in the region, as well as setting up new medical colleges, including the region's first AIIMS. The impact of the improved connectivity can be seen in the increasing tourist numbers in the region.

Northeast had faced severe internal security challenges for decades. Due to the effective steps taken by the Modi government, there has been a significant improvement in the security situation in the Northeast. Since 2014 there has been sharp reduction in the extremist incidents and the resulting deaths of security personnel and civilians. The signing of peace accords has led to peace and a decline in violence in the region. These

efforts have paved the way for reducing AFSPA coverage in the region. Long pending disputes between States in the Northeast had been a major concern in the region. Many decades-long disputes are finally getting permanently resolved through the active efforts of the Modi government. Recently Assam and Arunachal Pradesh have signed a Memorandum of Understanding to resolve a decades-old dispute over the shared boundary of the States.

The landmark decision to declare Bamboo as grass and the launch of the National Bamboo Mission gave a fresh impetus to the production of Bamboo-based products in the region. On numerous occasions, Prime Minister Narendra Modi has highlighted the success of Sikkim in promoting organic farming and becoming the world's first 100% organic State. From being on the margins of the India story, the Northeast is quickly becoming one of the country's growth engines.

POINTS TO REMEMBER

Taking Delhi to the doorstep of the Northeast

PM Modi has visited the Northeast at least 70 times. This is a record for any Prime Minister. When he shows his priorities through such actions, the whole government machinery understands the importance of this region.

Peace for Progress

- Framework Agreement with NSCN(IM), 2015
 - Tripura Peace accord, (NLFT/SD) 2019
 - Bodo Peace Accord, 2020
 - Bru Rehabilitation Agreement, 2020
 - Karbi-Anglong Peace Accord, 2021
 - Assam-Meghalaya boundary agreement, 2022
 - Adivasi Assam Peace Accord, 2022, DNLA Peace agreement 2023, ULFA Peace Acoord 2023, NLFT and ATTF
 - Peace Agreement 2024
- Peace accords have

reduced violence considerably in the region.

- Significant drop in insurgency and civilian deaths.
- Decades long border disputes finally getting resolved amicably.

The track to growth

- The Modi government is steadily bringing all parts of the Northeast on India's railway map.
- Three state capitals– Assam, Tripura and Arunachal Pradesh – are connected by broad gauge rail.
- Work on connecting

other state capitals is on track.

- Reducing travel time between Northeast and other states improves economic opportunities.
- Connectivity will enable commerce and the sale of goods produced in the Northeast across the country.
- Economic activity will reduce migration for employment and fuel further development.

400th Birth Anniversary of
**LACHIT
BORPHUKAN**

It has been the constant endeavour of the Prime Minister Narendra Modi to honour the unsung heroes in a befitting manner. In line with this, the country celebrated 2022 as the 400th birth anniversary of Lachit Borphukan. Lachit Borphukan (November 24, 1622 —April 25, 1672) was the famous General of the Royal Army of the Ahom Kingdom of Assam who defeated the Mughals and successfully halted the ever-expanding ambitions of the Mughals under Aurangzeb. He inspired the Assamese soldiers in the Battle of Saraighat, fought in 1671, and inflicted a crushing and humiliating defeat on the Mughals

Advantage Assam 2.0

- The two-day Advantage Assam 2.0 Investment and Infrastructure Summit 2025 was held in Guwahati, Assam
- The Rising North East Investors Summit 2025 attracted ₹4.3 lakh crore in investment interest.
- Over 80 countries participated, showing strong international engagement.
- Leading investors pledged ₹1.55 lakh crore across sectors like agriculture, digital services, and infrastructure.
- Extensive outreach included 9 roadshows, Ambassadors' Meets, and sector-specific interactions.
- PM Modi highlighted ₹21,000 crore invested in Northeast's education — 800+ new schools, AIIMS, medical colleges, and IIITs.
- The summit marks a New Economic Revolution positioning the Northeast as India's gateway to Southeast Asia.

“

It is rich Indian heritage that transcends tests of tide and times. It embraces the new. And hence we should be proud of this heritage.

- Narendra Modi

”

VIRASAT AUR VIKAS

13

OVERVIEW

Prime Minister Narendra Modi has placed strong emphasis on giving India's rich civilisational history and culture the recognition they deserve. After decades of neglect, various historically significant sites have been restored and revived under his leadership. The transformation of Varanasi through projects like the Kashi Vishwanath Corridor has transformed its narrow lanes, ghats, and temple areas. Similarly, initiatives such as the Mahakaal Lok Project in Ujjain and the MaaKamakhyā corridor in Guwahati aim to enhance the spiritual experience for devotees by offering state-of-the-art facilities while also boosting tourism and strengthening the local economy.

The 900 km long Chardham road project will provide seamless all-weather road connectivity to the four holy Dhams. PM Modi personally monitored the progress of redevelopment projects in Kedarnath, a temple extremely close to his heart. The newly unveiled statue of Adi Shankaracharya in the Kedarnath complex will be an eternal symbol of civilizational and cultural unity across regions. In August 2020, PM Modi participated in the Bhoomipujan for the Ram Mandir in Ayodhya, a memorable moment in the history of modern India.

To remove any trace of the colonial mindset, the PM inaugurated the 'Kartavya Path' which symbolised a shift from erstwhile Rajpath being an icon of power to Kartavya Path being an example of public ownership and empowerment. Bringing back the nation's lost heritage has been a priority for the Modi government. Over centuries, innumerable priceless artefacts had been stolen and smuggled abroad. The Modi government adopted a proactive

approach for 'bringing back our gods'. On numerous foreign visits, PM Modi discussed this matter with global leaders and multilateral institutions. Several priceless antiquities have been brought back to India in the last 11 years.

The Modi government has extended special recognition to nation-builders. The Statue of Unity in Gujarat, the world's tallest statue, has not only put Kevadia on the global tourism map but also become a way of remembering the Iron Man of India. Projects such as revamp of the Jallianwala Bagh complex and the development of sites related to Dr. B.R. Ambedkar as 'Paanchteerth' will etch the sacrifices and achievements of our nation-builders and freedom fighters in public memory. The Modi government has given recognition to all national heroes irrespective of their politics or ideology. A statue of Netaji Subhash Chandra Bose has been unveiled on India Gate to honour and celebrate his heroic legacy.

The newly inaugurated Pradhan Mantri Sangrahalaya, a museum in Delhi celebrating the lives and contributions of all Prime Ministers of India also bears a testament to the non-partisan recognition of all national heroes.

In 2019, Prime Minister Narendra Modi inaugurated the National War Memorial in New Delhi which remembers those who made the supreme sacrifice for the country. Though it had been under consideration since 1961, not much progress was made in this crucial project. Prime Minister Narendra Modi gave the much-needed momentum to this project and work started after approval in 2015.

India walks shoulder to shoulder with rest of the world when it comes to adopting the best practices and taking initiatives to highlight its culture combined with a modern outlook. India's cultural diversity has long generated international curiosity. A traditional drama like Abhigyan-Shakuntalam exists alongside an epic like the Mahabharata. Every atom has been transformed into a fantastic universe of folklore and tradition. The combination of history and technology with entertainment has resulted in the creation of the world's most amazing economic market, known as the Orange Economy. The World Audio Visual and Entertainment Summit (WAVES) was held in India for the first time to position India as an important player in the world's rapidly rising economy. The mega event held in Mumbai in May 2025 showcased the power and vibrancy of Indian art, culture, and content to the world.

'Kashi Tamil Sangamam' (KTS) 1.0 and KTS 2.0 were organised in Varanasi in November 2022 and December 2023 respectively. KTS 3.0 was organised in February 2025 in three cities (Ayodhya, Prayagraj and Varanasi in line with Maha Kumbh).

The objective of the programme was to celebrate, realm and rediscover the age-old links between Tamil Nadu and Kashi – two of the country's most important and ancient seats of learning. The Modi government has left no stone unturned to celebrate the idea of Ek Bharat Shreshtha Bharat, which aims to celebrate cultural diversity of the country.

POINTS TO REMEMBER

IN THE FOOTSTEPS OF LOKMATA AHILYABAI HOLKAR

Lokmata Ahilyabai Holkar, one of the greatest queens, is still remembered for rejuvenating temples. PM Modi is following in her footsteps!

Lokmata Ahilyabai Holkar	PM Modi
Built the present Kashi Vishwanath Temple in Varanasi	Developed the Kashi Vishwanath Corridor around the temple
Revamped famous ghats of Varanasi	Ghats cleaned; Ganga pollution reduced through Namami Gange
Refurbished Sarayu Ghat in Ayodhya	Construction of Bhavya Ram Mandir
Rebuilt Juna Somnath Temple	Development works around the Somnath temple, building Parvati Mandir

Unlike leaders of the past, PM Modi wears his culture on his sleeve

- PM Modi has never shied away from giving our culture its due respect.
- The government, too, works to promote India's culture and values.
- In the gifts that PM Modi gives to dignitaries, and the places world leaders visit in India, our cultural heritage is highlighted.
- He has also made proactive efforts to ensure the return of stolen antiquities and artefacts.

From Somnath to Kedarnath, from Ayodhya to Ajmer, from Varanasi to Velankanni

- Modi government considers it a duty to preserve sites of importance, irrespective of region or religion.
- While PM Modi's work in Somnath, Ayodhya, Kedarnath, etc, are well known, places of every religion are being developed

under PRASHAD scheme.

- Upgrade of Cheraman Juma Mosque, Hazratbal, Ajmer, St Thomas Shrine and Velankanni has been taken up.
- St Luke's Church in Kashmir was renovated and reopened after 3 decades.

Honouring India's greats

- Statue of Unity honours **Sardar Vallabhbhai Patel's** contribution to creating a united India.
- **Netaji Subhas Chandra Bose's** legacy being honoured: On the occasion of the 125th birth anniversary celebrations of Netaji Subhas Chandra Bose, a multi-media exhibition- Nirbhik Subhas and 3D projection mapping show on Netaji was inaugurated by Hon'ble PM of India Shri Narendra Modi on 23 January, 2021. He also unveiled a book "Letters of Netaji" and commemorative coin and

stamp in the memory of Netaji Subhas Chandra Bose. A statue honouring him was unveiled at India Gate.

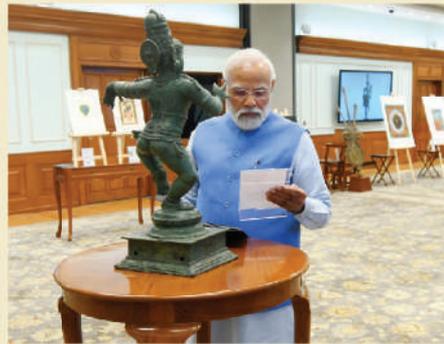

- **Mahatma Gandhi's** legacy carried forward through Sabarmati Ashram redevelopment.
- Panchteerth brings **Dr. Babasaheb Ambedkar** to the centre of India's discourse and recognizing his contributions.
- **Jallianwala Bagh** memorial's uplift helps make memories of the freedom struggle relevant to future generations.
- **11 Tribal Freedom Fighter Museums** being developed.
- No political bias in recognizing and respecting nation builders. Neither one person, nor one party, but a museum for all Prime Ministers at PM Sangrahalaya.

India is committed to furthering sustainable development in line with our culture of living in harmony with nature.

- Narendra Modi

”

ENVIRONMENT AND SUSTAINABILITY

14

OVERVIEW

The Atharva Veda says, 'The Earth is our Mother and we are her children'. Indian philosophy and lifestyle have always been rooted in the concept of coexistence with nature.

Over the last 11 years, under Prime Minister Narendra Modi's leadership, India has emerged as a global leader in the fight against climate change.

When PM Modi took over in 2014, India was globally seen as a roadblock in climate negotiations. However, the Prime Minister has given solutions to forge a path forward. Since COP21, the Prime Minister's principle of climate justice has ensured that equity concerns aren't ignored in climate change negotiations. India has remained focused on providing a 'fair deal'.

At COP26 in Glasgow, the Prime Minister introduced the idea of LiFE. India believes that climate action starts at the individual level and Prime Minister Modi has provided a simple solution to the complex problem of climate change.

There has been a significant increase in forest cover in the country. Over the past decade, the tiger population in India has more than doubled and today India is home to 75% of the world's tiger population.

Further the inter-continental translocation of African cheetahs has provided a boost to India's wildlife diversity. In 2023, after 70 years, cheetah cubs were born in India as the wildcat had previously become extinct in the country.

While many countries fail to fulfill their climate targets, India has hit targets long before deadlines. For example, the target for achieving 40% of installed electricity capacity from non-fossil sources, which was set at COP21, was fulfilled ten years ahead of schedule. Targets set for Ethanol Blended Petrol under the National Policy on Biofuels were also achieved 5 months ahead of schedule.

The Namami Gange programme has successfully arrested pollution of the holy river and improved water quality at numerous locations. This cause has been extremely close to PM Modi's heart, as evident in his decision to donate all proceeds from an auction of gifts he received to the Namami Gange programme. The last 11 years have witnessed a rapid transition towards renewable sources of energy. Numerous incentives for the renewable energy sector and lower cost of inputs have led to a massive decrease in renewable energy tariffs.

Further, the UJALA programme has led to thousands of crores of

savings while reducing carbon dioxide emissions.

Meanwhile, as part of its global leadership in promoting clean and renewable energy, India under PM Modi championed and led the formation of the International Solar Alliance.

The newly launched National Green Hydrogen Mission aims to make India energy independent, as well as a hub for the production and export of green hydrogen. From cleanliness to avoiding single-use plastic, the Prime Minister has often encouraged citizens to make lifestyle changes to contribute to the environment. By transforming these causes into mass movements, he has ensured impact at scale rather than a temporary shift in public habits.

According to Prime Minister Modi- our planet is one but our efforts have to be many - One earth, many efforts. India stands ready to support any effort for a better environment and to further global wellness.

* * *

AT A GLANCE

POINTS TO REMEMBER

Ensuring sustainable development

- Modi government has demonstrated that **development can go hand-in-hand with environmental protection.**
- Environmental law reforms under PM Modi have led to **both better compliance and ease of doing business.**

India is shaping the global climate change debate

- Unlike the past, India is now a **leading voice** in climate change negotiations.
- India has made **'climate justice'** central to global climate change discourse.
- PM Modi's **'Panchamrit'** and **'LIFE – Lifestyle For**

Environment' initiatives highlight India's position as a global role model in countering climate change.

- **GOBARdhan** is a Waste to Wealth initiative in tune with the circular economy and Mission LiFE initiatives of GoI, launched on 30 April, 2018 as a part of SBM-G.
- Beneficiaries of GOBARdhan projects from biogas and sale of bio-slurry are industries/entrepreneurs, rural households, farmers, SHGs, Gaushalas, Gram Panchayats.
- GOBARdhan ensures scientific management of bio-waste, resulting in cleanliness in villages and generation of wealth

and energy by converting cattle dung and solid agricultural waste into compost and biogas.

Transformation of India's green landscape through Jan Bhagidari

- Big targets and speedy achievement have been hallmarks of India's renewable energy policy.
- Since 2014, there has been a 41-fold increase in solar energy capacity.
- PM Modi has encouraged people's participation in environmental protection.
- From Swachh Bharat to the end of single-use plastic, he has motivated citizens and brought a voluntary change in everyday habits.

* * *

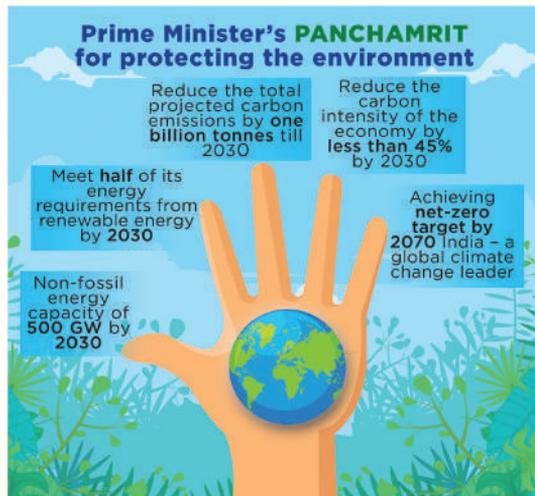

Did you know?

At the COP26 Summit in Glasgow, PM Modi pitched for a 'one-word movement' before the world in the form of 'LIFE' which stands for **'Lifestyle for Environment'**

The Prime Minister called upon the world to make **'Lifestyle for Environment'** i.e. **LiFE** a global mission to fight climate change. The vision emphasizes not only energy production but also energy conservation and sustainable living. These solutions include energy-efficient ACs, geysers, heaters and ovens.

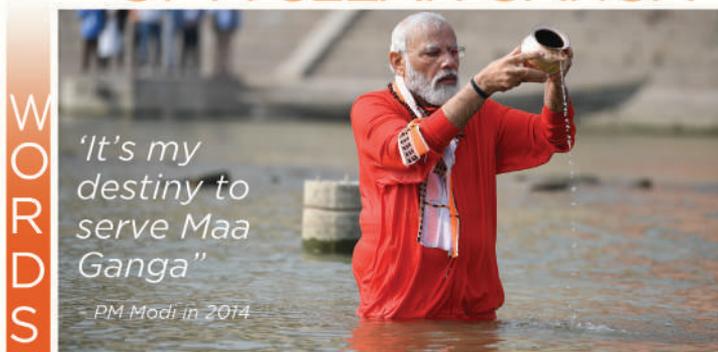

MILESTONES

■ Launched by PM Modi, **International Solar Alliance** envisions mobilising **\$1 trillion** in solar investments by 2030

■ In 2014, India had 26 Ramsar sites. In last 11 years, India has significantly increased its commitment by adding **59 new Ramsar sites**

REALIZING THE DREAM OF A CLEAN GANGA

Namami Gange programme launched in 2014 as a flagship initiative

- So far, a total of 494 projects have been sanctioned at an estimated cost of ₹40,481 crore; 315 projects have been completed and made operational.
- Increase in Sewage Treatment Plant capacity has led to a cleaner river.
- Aquatic species like dolphins are returning.
- Millions of litres of pollutants that used to be dumped into the river stopped.
- The proceeds from the auction of PM's memento is pledged to the Namami Gange Project

ACTION

The story of India's massive renewable energy push

PM Modi promised the world that India would hit 500 GW non-fossil fuel based power capacity by 2030.

Ambitious? But India is already setting record pace.

Non-fossil fuel based power is 49.1% of total installed capacity.

(as on April 2025)

India's installed clean energy capacity grew a whopping

2.9 times since 2014! (as on April 2025)

As of March 2014

76.38 GW
was India's installed
clean energy capacity.

In just 11 years, it has
been almost tripled to

228.28 GW

(as on April 2025)

Here's how India is an emerging global leader in renewable energy!

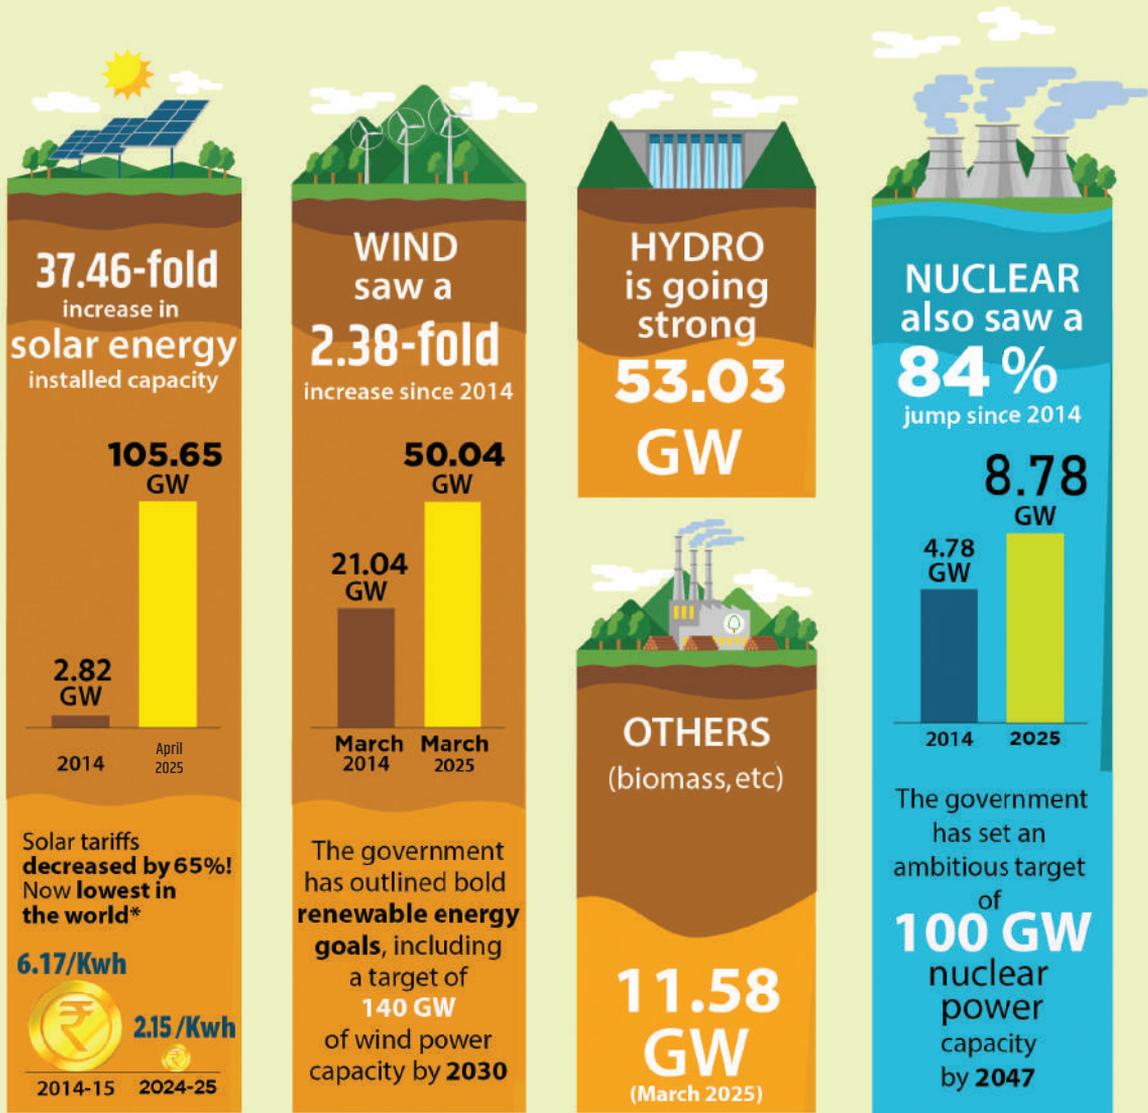

- India now has the **4th largest** clean energy capacity in the world.
- India has the **4th largest** installed wind energy capacity.
- India has the **3rd largest** solar installed capacity.

The Renewable Energy Country Attractiveness Index ranks countries on attractiveness of investment and deployment opportunities.

Rising up in the
**Renewable Energy Country
Attractiveness Index**

India is leading by example

Achieved COP21 target of 40% energy from non-fossil fuel sources, sources, nine years ahead of schedule. India remains in track to fulfill the SDGs.

Bringing A Global Transformation

PM Modi spearheaded the global initiative to form the **International Solar Alliance**, which currently has 105 member countries and 18 signatory countries.
