INTRODUCTION

Prime Minister Narendra Modi's NDA government has completed eight years of 'Seva, Sushasan and Garib Kalyan'. These eight years have been dedicated to working for the welfare of the poor, facilitating the middle class, empowering women, implementing pro-farmer policies, creating educational and job opportunities for our youth, ensuring social justice and developing every region of India. PM Modi has brought the politics of development - Vikasvaad - into the mainstream, making it the focal point around which political discourse and policy action revolves.

Since assuming office in 2014, PM Modi has remained firm in his resolve of keeping 'India first' in every policy formulation and action. The

government has guarded India's borders, ensured internal security, and consistently promoted our interests abroad.

From the digital revolution to the elimination of open defecation, from vaccinating the entire eligible population through indigenous vaccines to increasing defence exports

significantly, over the last eight years India has successfully achieved what was essentially considered unimaginable in the past.

These last eight years have witnessed a paradigm shift in public service delivery and the implementation of government schemes and infrastructure projects. From the completion of infrastructure projects delayed by decades to the provision of basic facilities that earlier governments failed to provide, there has been a turnaround in governance in India. The government has ensured irreversible empowerment for various marginalised groups, helping them become self-reliant by providing a social safety net.

In stark contrast to piecemeal delivery of the past, the Prime Minister has always focused on ensuring that no one is left behind and unable to access basic facilities. The

massive expansion of welfare coverage over the last eight years has allowed India to finally aspire to achieve 100% saturation. Saturation coverage of the benefits of good governance ends politics of discrimination and corruption that used to be played by providing benefits to some while denying the same to others.

Adopting stiff targets considered almost impossible to achieve earlier, and fulfilling them on time, has become the new normal under PM Modi's leadership. India has transformed from being a mere onlooker to a global leader in various spheres. In New India, development does not

involve trade-offs related to the environment – both go hand in hand. Over the last eight years, the government has given due recognition to Indian culture and values and promoted India's rich civilisational heritage across the globe.

After first assuming an elected office in 2001 as Chief Minister of Gujarat and then going on to become the Prime Minister, in the past twenty years, Narendra Modi has set a new benchmark in reforms and governance which has become a model not just in India but in many parts of the world. He has not only encouraged people to aspire but also provided adequate government support for fulfilling their rising

aspirations. He has also inspired the nation by encouraging everyone to think of the next twenty-five years as the 'Amrit Kaal' for building a strong, prosperous and inclusive India.

This book provides a detailed look at India's transformation under PM Modi's visionary leadership across fourteen areas of governance and policymaking. From welfare to culture, from ease of doing business to national security, from economic growth to ease of living, the book discusses various initiatives taken by the Modi government since 2014. The book documents the story of 'New India'.

1

SERVING THE POOR AND MARGINALISED

OVERVIEW

It was extremely distressing that even after several decades since independence even basic facilities such as banking, toilets, LPG cylinders, tap water connections, electricity connections, healthcare, etc. have not been provided to the citizens. These facilities that should have been provided to all citizens in the previous century itself are finally reaching all Indians in the 21st century due to Prime Minister Narendra Modi's tireless efforts. The umbrella of welfare schemes started by the Modi government in 2014 has successfully ensured widespread access to basic facilities for most Indians.

The Modi government has ensured that citizens, irrespective of their caste, religion, gender, region, economic class, or political preferences, received their entitled benefits. As the government has shifted focus to saturation, soon, all Indians will have access to these basic facilities. Saturation coverage of basic facilities has been the hallmark of the endeavour of the Modi government.

The Modi government has successfully managed to plug leakages in public service delivery. The government's efforts to extend welfare provisioning and poverty

alleviation have received recognition from global institutions. A recent IMF paper has credited the Modi government for ending extreme poverty in the country.

Various programmes of the Modi government have empowered marginalised groups such as Scheduled Castes, Scheduled Tribes, and Other Backward Classes. PM Modi's approach towards social justice has centred around irreversible empowerment. This ensures individuals from marginalised groups become self-reliant and self-sufficient rather than remaining dependent on the political establishment for their needs. Programmes such as MUDRA Yojana and Stand Up India are creating a large pool of young entrepreneurs from marginalised groups. These individuals not only achieve better lives for their respective families but also become an inspiration for others within their respective communities.

The Modi government's historic decision to provide reservations for economically weaker sections provided much-needed support to poor households. Creating a new category meant that this extension of benefits did not reduce benefits already extended to other marginalised

groups.

The government has corrected past wrongs and ensured the long-pending rights of marginalised groups. For instance, the government's decision to implement OBC and EWS reservations in all India quota seats in medical education. This will ensure that students from these groups can also aspire to become doctors in affordable government colleges. The work done on empowering Divyangjan, Transgender persons, Denotified and Nomadic tribes, and other such hitherto unserved or underserved groups including drug dependents is also noteworthy.

An integral element of PM Modi's policy has been the effort to recognize icons of social empowerment. This builds self-pride among communities by highlighting their contribution to nation-building. For instance, the government has declared November 15 of every year as Janjatiya Gaurav Divas to commemorate the sacrifices of brave tribal fighters for the country. Such recognition increases the self-confidence of various communities and strengthens their resolve to work for the country's progress.

117

Aspirational Districts

have surpassed their respective state average on development parameters

POINTS TO REMEMBER

Antyodaya and saturation coverage end appeasement

Welfare schemes from 2014 have been motivated by the **principle of Antyodaya** (no one is left behind). It means the government is targeting 100% saturation in every scheme.

100% coverage means everyone will get the benefits of governance!

Irreversible empowerment for marginalised groups

- Earlier, the attitude of certain governments was to patronise the marginalised groups by ensuring some **piecemeal benefits**.
- They wanted to **keep the people dependent** on them, and hence, irreversible empowerment was denied.
- But now, PM Modi has ensured a shift from patronage-based support to **irreversible empowerment**.
- Schemes like Stand Up India and MUDRA Yojana are empowering individuals from marginalised groups by providing entrepreneurship opportunities.
- These entrepreneurs will shape aspirations and become **role models for the entire community**.

Ending the politics of low expectations and low delivery

- Once a gas connection is given, an electricity connection is given or a tap water connection is given, **none can take it away**.
- Further, the poor become aspirational and have **higher expectations** since their basic needs are met.
- This creates greater expectations from governments and pushes them to deliver more.
- For a long time, India was **harmed by politics of low delivery and low expectations**. But now, that is being changed by PM Modi.

ENSURING
FARMER
WELFARE

OVERVIEW

Over the last eight years, Indian agriculture has touched new heights due to Prime Minister Narendra Modi's Beej Se Bazar Tak approach. The government has focused on protecting farmers from various risks, extending income support, improving access to information, and building forward linkages. This has led to the modernization of Indian agriculture and a substantial increase in farmer incomes.

Since 2014, the Modi government has taken multiple measures to make farming in India less risky by building a safety net for farmers and reducing their dependence on rainfall for irrigation. Earlier, an extended dry spell or crop damage after just a few days of untimely rains would drive lakhs of farmers into heavy indebtedness. The Pradhan Mantri Fasal Bima Yojana changed this status quo. Launched in 2016, the scheme overhauled the agriculture insurance system and has provided a much-needed safety net for farmers. The PM Krishi Sinchayee Yojana has expanded irrigation coverage and reduced

farmers' dependence on rainfall for irrigation.

Record production and consequent increase in procurement by the government have led to an unprecedented rise in farm incomes. Moreover, the gradual transition towards payment to farmers through DBT has protected farmers from unfair charges and commissions charged by intermediaries.

In 2019, the government launched the PM Kisan Samman Nidhi to provide an assured cash transfer of Rs. 6,000 per year to farmers. This supplemental income received through regular instalments has enabled even small farmers to purchase better quality inputs, improve their land productivity, and increase their income.

Indian farmers are steadily transitioning towards 'smart' farming as useful scientific information and the latest innovations in agriculture are being made available to them. Rich insights from soil health cards issued by the government have helped farmers make efficient use of various inputs and maximize their yield. Through multiple programmes, small farmers are being

encouraged to adopt natural and organic farming. This has led to lower investments on inputs, higher farm incomes and protection from the perils of climate change and various uncertainties.

Strengthening forward linkages of agriculture is necessary for improving the condition of farmers. Linking agriculture markets throughout the country through the e-NAM initiative has brought transparency and increased competition in agriculture markets. This has not only enabled farmers to get better prices for their yield but also reduced price distortions that hampered consumer interests. The Production Linked Incentive (PLI) scheme for food processing industries is a turning point for Indian agriculture as there will be a massive increase in domestic demand for farm produce.

The steady increase in farm yields and stability of Indian farmers over the last eight years has brought a paradigm shift in Indian agriculture. Today, Indian farmers aren't producing for just self-consumption or sale in the domestic market. Instead, they seek to export their products and feed the world.

POINTS TO REMEMBER

Beej se Bazaar Tak

- The Modi government has stood by Indian farmers and provided support across various stages of the agriculture cycle.
- **From seeds to soil health, from insurance to irrigation, from MSP to markets** – a comprehensive approach has led to the empowerment of farmers at every step.

Market linkages to improve farmer income

- **eNAM:** Unified national market has increased competition, provided better price discovery.
- **Farmer Producer Organisations:** Sale through FPOs is facilitating better prices and higher returns for farmers.
- **Forward linkages:** Number of mega food parks has shot up from 2 in 2014 to 23 in 2022!

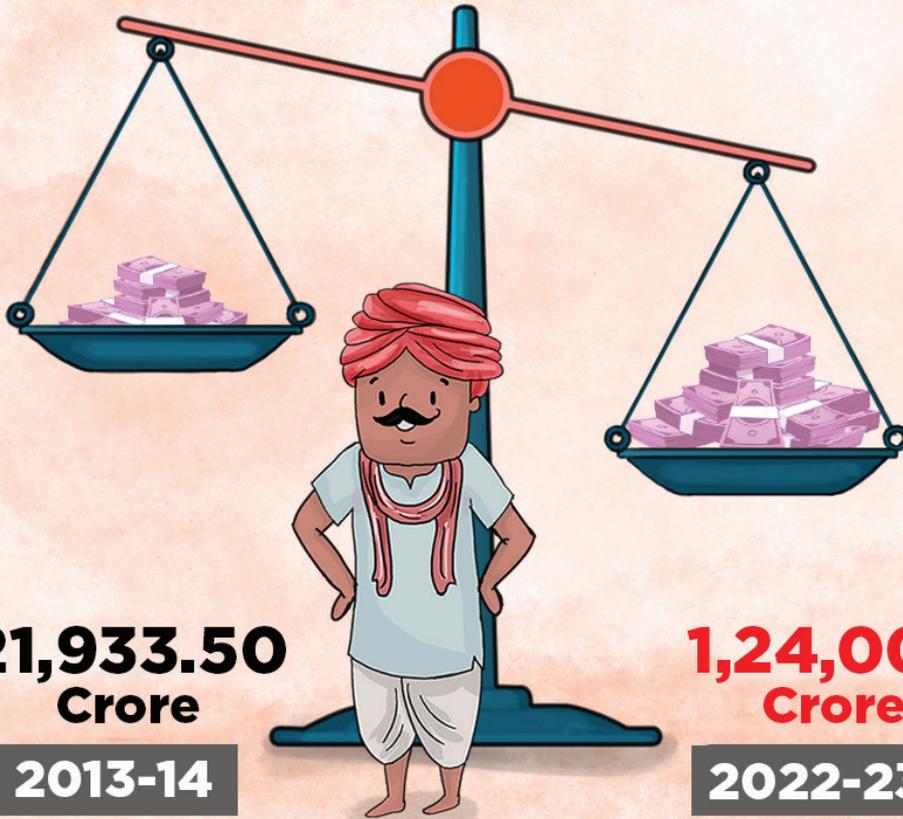

Start-up ecosystem in agriculture

- 1055 start-ups in agriculture and allied sectors during 2019-20 and 2022-23 sanctioned 10,932.24 lakhs of grant-in-aid.

NARI SHAKTI FOR NEW INDIA

OVERVIEW

Prime Minister Narendra Modi considers women-led development a central dimension of India's progress and necessary for strengthening India. In the last eight years, the Modi government has launched numerous welfare schemes that have aimed to empower women and make them lead India's development journey. These programmes have provided much-desired assistance to women at various stages in their lives. They have also unshackled Indian women and freed them from the drudgery they experienced in daily life. However, rather than merely limiting his role to the distribution of state-led welfare benefits, PM Modi is using the power of mass movements to bring about social transformation. His efforts are enabling women to overcome social barriers and fulfil their aspirations.

The Modi government has taken a remarkable lifecycle-based approach towards women empowerment. A wide range of government programmes assist women at various stages - from childhood to adulthood and even during old-age - to ensure their safety and empowerment. At every step, opportunities are opened up to help increase

women's choices as well as empower them to take those decisions to their logical conclusion.

Mission Poshan fulfils the nutritional requirements of children, adolescent girls, pregnant women, and lactating mothers. One Stop Centres (OSCs) assist women in distress. The Pradhan Mantri Matru Vandana Yojana (PMMVY) and Pradhan Mantri Surakshit Matritva Abhiyan (PMSMA) incentivize institutional deliveries and regular health check-ups for pregnant women and lactating mothers. The impact of this approach has been evident in many outcomes, such as an improved sex ratio at birth, a rise in institutional deliveries, declining infant mortality, and a lower maternal mortality rate. Programmes such as MUDRA Yojana have allowed crores of women across the country to pursue micro-level entrepreneurship and become financially independent.

PM Modi has made unshackling women and freeing them from the drudgery of everyday life a key objective of policymaking. Every flagship welfare scheme launched by the Modi government has improved the lives of women across the country. LPG

cylinders under the Ujjwala Yojana have saved crores of women from chronic respiratory disorders through smoke-free kitchens and ended the daily ordeal of collecting firewood for cooking. Due to the Swachh Bharat Abhiyan, crores of women can access toilets at their convenience without any fear over safety or violation of dignity. Walking long distances to collect water for daily consumption is becoming history as households across the county are getting private tap water connections under the Jal Jeevan Mission. As owners of the family home received under PM Awas Yojana, women are becoming active participants in household decision-making.

Since 2014, PM Modi has been a pillar of support and encouragement for Indian women in their quest to break innumerable barriers, open new doors for themselves, and fulfil their aspirations. In the last 8 years, there has been a massive increase in women police personnel. In 2018, PM Modi announced a landmark decision to allow permanent commission for women in the armed forces. Across diverse fields, women are taking the lead in India's rise, from sports to academics to performing arts.

POINTS TO REMEMBER

Why women support PM Modi - Social transformation for women empowerment

- Proposal to **raise marriageable age of women** from 18 years to 21 years helps with education and employment.
- **Law against Triple Talaq** protects Muslim women from exploitation.
- **Increase in paid maternity leave** period from 12 weeks to 26 weeks makes work-life balance possible for working women.
- Scrapping of Article 35A has given rights to women in J&K that were historically denied.

* * *

Removing drudgery from the daily life of women In rural or semi-urban areas, even getting basic necessities used to be a battle for women. But, not anymore.

THEN	NOW
Women walked long distances to lakes, ponds or borewells and brought back heavy loads of water.	More than 10 crore tap water connections.
Women inhaled smoke from wood-fired kitchens. They went out to collect firewood for cooking.	Ujjwala Yojana's 9 crore LPG connections freed women from respiratory diseases.
Women had to go to isolated places to relieve themselves, endangering their health, safety and dignity.	Swachh Bharat's 11.63 crore toilets have removed these worries.
Kerosene lamps harmed respiratory health and eyesight of people in poor families, especially women and children	2.86 crore SAUBHAGYA electricity connections have made kerosene lamps a matter of the past.

YOUTH-LED DEVELOPMENT

OVERVIEW

P rime Minister Narendra Modi's unmatched connect with the country's youth has ensured that the government has been able to not only fulfil their aspirations but also harness immense talent for national progress. Today's youth see nothing as unattainable and aspire to make India a global leader in unchartered territories that earlier generations usually avoided. Rather than dismissing their 'can do spirit,' the Prime Minister has consistently created a conducive environment through an enabling policy framework.

Unlike earlier generations that used to aspire for salaried jobs, a large segment of today's youth seeks to explore self-employment opportunities. In multiple addresses since 2014, the Prime Minister has encouraged the Indian youth to pursue their desire to start entrepreneurial ventures and become job creators rather than just job seekers. His encouragement has played an instrumental role in creating a critical attitudinal shift in society, the cornerstone of the success of India's startup ecosystem. Today, youngsters are willing to take risks to fulfil their dreams. They know that PM Modi will provide constant

support in their endeavour.

Through the Startup India programme launched in 2016, the Modi government has taken numerous measures to promote startups and entrepreneurship. This includes tax exemptions, easing regulations, and reducing the compliance burden.

Like entrepreneurship, sports was considered a forbidden field for most youngsters. It used to be viewed merely as a leisure activity, and parents usually discouraged children from professionally pursuing sports. PM Modi brought a crucial mindset change and introduced various policies that have allowed innumerable youngsters to fulfil their dream of pursuing sports as a career. India saw its best performance ever in the Tokyo Olympics and Paralympics recently. This has been an outcome of long-term planning and support through the flagship TOPS programme.

World class education and skill development opportunities being created by the Modi government are empowering our youth and contributing to the collective dream of building a strong labour force. In the last eight years, record numbers of new IITs, IIMs, medical colleges, and universities have been opened across the country.

Since its launch, more than 1.37 crore youngsters have received skill training under the PM Kaushal Vikas Yojana and improved their employability.

The National Education Policy (NEP) approved in 2020 is bringing a paradigm shift in the Indian education system through much needed and long-pending reforms in school and higher education.

The Modi government has focused on providing meaningful employment to the Indian youth that enables them to achieve a better life for their family. India has become a preferred destination for investment, and employment opportunities are being created for crores of young Indians. The massive rise in new EPFO accounts confirms the Modi government's success in creating new formal jobs. Consistent efforts to assist MSMEs and programmes such as Production Linked Incentive Scheme for domestic production have contributed towards job creation. The record exports achieved in 2021-22 have taken job creation and hiring to a positivity level that is better than even the pre-pandemic years! Moreover, the current unemployment level is lower than the pre-pandemic levels indicating new employment opportunities for crores of youngsters.

POINTS TO REMEMBER

Indian youth: from job seekers to job creators

- PM Modi is changing societal mindset and creating wider **acceptance for risk takers**.
- Self-employment and entrepreneurship are becoming popular occupational choices.
- Various schemes are aimed at giving **institutional support to entrepreneurs**.

2021: A remarkable year for Indian sports

- India won the **highest ever medal tally** in its history in Tokyo Olympics and Paralympics.
- **Long-term planning** since 2014 led to this

record success.

- Extensive support to sportspersons through **TOPS** programme.
- Khelo India is **making sports a mass movement** and building a sporting culture across India.

Ensuring jobs for young India

- Robust economic policies are creating lakhs of new employment opportunities annually.
- **Record goods exports** of over \$422 billion in 2021-22, of which massive engineering exports were a part.
- **1.37 crore people skilled** under PM Kaushal Vikas Yojana, improving employment prospects.

- **3.52 crore new EPFO subscribers added** between 2017 and 2022 – each is one formal job!
- 1.2 crore new EPFO accounts added in 2021-22, **despite the pandemic**.
- Most surveys indicate robust hiring sentiment and **lesser unemployment than pre-pandemic years!**
- **MUDRA Yojana** supported crores of new entrepreneurs and created jobs.
- Tech start-ups created **23 lakh direct and indirect jobs** in the 2017-2021 (NASSCOM)

* * *

Did you know?

Direct Job Indicators

- EPFO subscribers increased by 3.52 crore from 2017 to 2022
- Over 1 crore youth between the ages of 18-28 years added to EPFO since April 2020
- India's start-up ecosystem created nearly 23 lakh direct and indirect jobs in 2017-2021 as per a NASSCOM report
- Hiring activity in pandemic-hit 2021 was 34% higher than 2020 as per a CII study
- The Naukri Job Speak Index saw an impressive 41% rise from 1,925 in January 2021 to 2,716 in January 2022

Indirect Job Indicators

- India's goods exports hit a record \$422 billion in 2021-22
- Engineering exports in 2021-22 were 46% more than 2020-21
- Apparel exports in 2021-22 showed a 30% growth. It is estimated that each additional \$1billion of apparel exports creates 1.5 lakh jobs!

PERSPECTIVE

PM Modi personally supports Indian youth's 'can do' spirit

COMMITTED TO SUPPORTING START-UP CULTURE

"Another change that is now visible is that earlier if a youth launched any start-up, people used to say

'Why don't you do a job?
Why a start-up?

But now people say -
'Job is alright, but why don't you create your own start-up'?

And the first reaction to seeing young people who are already in start-ups is:
'Wow, it is your start-up!'"

PM Modi's address at Prarambh - Startup India International Summit 2021

ENCOURAGING YOUTH

"Today's youth has a "Can Do" spirit which is a source of inspiration for every generation."

PM Modi's address at National Youth Festival 2022 (January 12, 2022)

ENABLING THEIR ENERGY

"I am fully committed to converting the energy of the youth into the energy of the country."

PM Modi's address at interaction with start-ups (January 15, 2022)

MAKING INDIA A SPORTING POWER

EFFORTS

Target Olympic Podium Scheme (TOPS) has provided comprehensive support to Indian athletes.

1,000 Khelo India centres being set up to find grassroots talent.

Over 2,500 athletes selected under Khelo India provided with assistance of Rs. 6.28 lakh/year.

RESULTS

Tokyo Olympics 2020

1 Gold,
2 Silver, and
4 Bronze,
highest ever tally

MIDDLE CLASS
AND EASE
OF LIVING

OVERVIEW

Since 2014, ease of living in everyday life is becoming a reality for households across the country, be it in urban areas or rural, be it poor or the middle class. From welfare programmes to infrastructure investment, from modifying government processes to introducing protective regulation, ease of living for citizens has been the central objective of policymaking under the Modi government.

Prime Minister Narendra Modi has ensured that ease of living has ceased to remain a privilege of a few. The Modi government has assured that citizens across all segments of the society have access to basic facilities such as banking, LPG connections, sanitation, electricity, tap water, and affordable healthcare. Government programmes for providing these facilities are ensuring that India's aspirational class experiences a significant improvement in the quality of daily life over the last eight years. Today, a smoke-free kitchen or uninterrupted power supply is a reality rather than just a dream for most households in the country.

Lower taxation and affordable borrowing rates

have led to massive savings for middle-class households and expanded their disposable income. Positive changes in income tax exemptions and direct tax reforms have reduced their tax burden and made tax filing simpler for the middle class. The Goods and Services Tax has led to a decline in a wide range of everyday expenses for consumers. From items of daily household consumption to leisure activities such as eating out in restaurants, affordability has increased after the introduction of the GST.

Crores of urban middle-class households are fulfilling their lifelong dream of owning a house. A sharp reduction in interest rates and the Modi government's Credit Linked Subsidy Scheme under PM Awas Yojana have enabled people to buy their first home. Alongside this, strengthening the regulatory framework through steps such as the formation of the Real Estate Regulatory Authority (RERA) has ensured that the lifetime earnings of citizens are protected by a legal framework that upholds the rights of homebuyers.

Prime Minister Narendra Modi's big push on

infrastructure since 2014 has also helped middle-class households reduce expenditure. The UDAN programme has provided air connectivity to numerous tier 2 and tier 3 cities and ensured that air travel isn't limited to the affluent. Travelling by train isn't the default option for middle-class households anymore as the UDAN scheme has made air travel more affordable. In the last eight years, a record number of metro rail projects have been approved and commissioned in numerous cities. As a result, citizens are now shifting from private vehicles to public transportation and making considerable savings without compromising on comfort.

The Digital India initiative has made the government more accessible and transparent to citizens. Now, citizens can access hundreds of services provided by central and state governments at the click of a button through the UMANG app. Apps like Digilocker have removed the need to carry physical copies of documents.

Through various steps for ease of living, the Modi government is transforming the daily life of Indian citizens, removing routine worries and raising their quality of life.

POINTS TO REMEMBER

Taxes are no more a worry because...

- **E-filing** has become the norm.
- **Refunds** arrive in a matter of days, not months.
- Faceless assessments and appeals **reduce harassment**.
- Tax rates have actually **reduced!**

A trusted government, a trusting government

- Modi government has created an **atmosphere of mutual trust**.
- By taking steps like enabling **self-attestation**, the government has

shown it trusts citizens.

- The increase in the number of IT returns from 3.91 crore for FY13-14 to 7.14 crore for FY20-21 shows that the **people trust the government** to use their taxes correctly!

Owning a house within everyone's reach, whether poor or middle class

- **For the poor**, there is PM Awas Yojana in both rural and urban areas
- **For the middle class**, the Credit Linked Subsidy scheme brings down interest rates. Home loan interest rates are also down!

- **RERA** ensures timely delivery of homes, so that the money of homebuyers is not stuck.

'Ease of Travel' and improved connectivity

- **Expansion of metro rail** is making local travel in cities much easier for urban residents.
- **UDAN** scheme has enabled affordable air travel and connectivity to many tier 2 and tier 3 cities.
- **Car loan interest rates have fallen** from almost 11% in 2014 to less than 8% now.

* * *

Did you know?

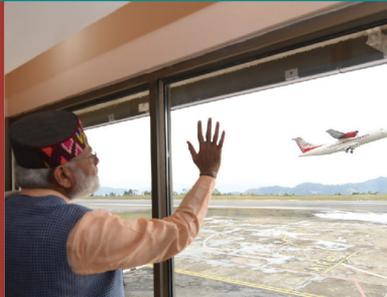

- 40% of Indians are covered under Ayushman Bharat
- As per the National Health Accounts Estimates for India, the per Capita expenditure including Capital expenditure were Rs. 1261 in 2015-16, Rs. 1418 in 2016-17 and Rs. 1753 in 2017-18
- India registered 231% (83.4 crore) growth in Internet connections
- World's cheapest sanitary pads (Re. 1) are sold at more than 8,700 Janaushadhi Kendras
- At 26 weeks of paid maternity leave, India ranks higher than China, Singapore, Germany, and USA
- India added over 5,700 new colleges since 2014, that is almost 2 new colleges per day
- Vande Bharat Mission operated around 2.17 lakh flights and brought over 1.83 crore people home from all over the world

PERSPECTIVE

Connecting India's cities

Metro:

Metro connectivity used to be present in only 5 cities as of 2014. Now, it is in 20!

Electric Buses:

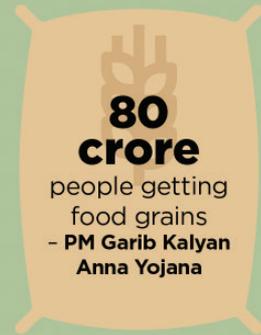

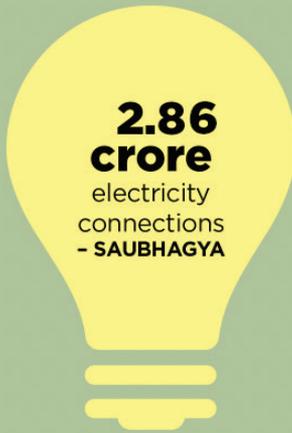

Electric Buses: 2092 electric buses now deployed across the country under FAME II

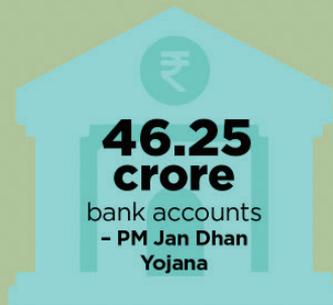

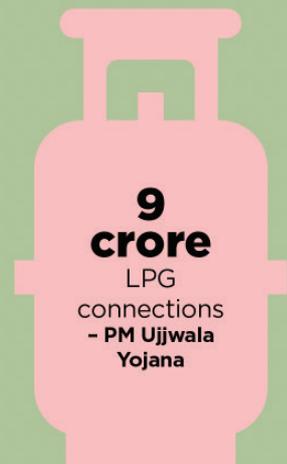

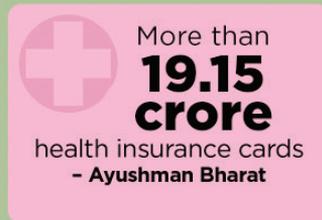

Air Travel:

Number of operational airports almost doubled, from 74 in 2014 to 142 in 2022!

Ease of living is not an 'elite only' concept for PM Modi - making rural and poor citizens' lives easier

A DAY IN THE LIFE OF MIDDLE CLASS

HOW EASE OF LIVING HAS BEEN ENSURED

- * Waking up in a **home of your own**. Builder delivered on time due to RERA.

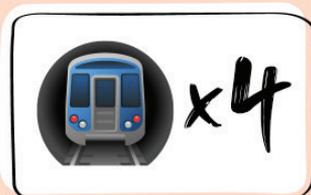

- * **Saved Rs. 2.3 lakh** in housing loan due to Credit Linked Subsidy Scheme

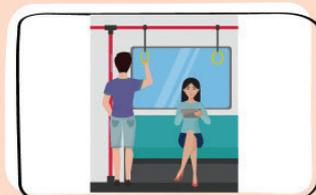

- * **Drop in home loan interest rates** helped save lakhs more!

- * Got an e-rickshaw to the metro. Paid Rs. 30 via **BHIM UPI**, saved time

- * The number of cities with metro quadrupled **since 2014**

- * Watching a motivational video in the metro. Data rates **97% down**

- * Time for tax returns. **Easy e-filing done.**

- * Refunds appear in **just a few days**

- * Eating out, **GST is just 5%**. Taxes used to be 20% earlier.

- * Buying medicines for parents at Jan Aushadhi, **50% lesser than market price**

- * **Massive savings on electricity bills** due to UJALA LED lights

- * **Watching Yoga videos**, bought with the profit from spouse's MUDRA-funded boutique

Savings for middle class - income tax

For Rs. 15 lakh income, here is the difference the Modi government made to your taxes and savings!

Financial Year	2013-14	2022-23
Total income	15,00,000	15,00,000
Chap VIA Deduction	1,00,000	2,00,000
80D	15,000	25,000

INFRA AT
SPEED AND
SCALE

OVERVIEW

Over the last eight years, India has taken a crucial step towards becoming a global economic powerhouse by building world-class infrastructure. The Modi government has completed numerous infrastructure projects that were hitherto considered unachievable due to inordinate delays and other constraints. A trade-off between speed and scale is history as timely completion of public works projects has become a norm rather than an exception under Prime Minister Narendra Modi's leadership.

Thinking big and delivering without delay have been hallmarks of infrastructure development under the Modi government. PM Modi's active role has made the infrastructure turnaround possible. Rather than merely announcing new projects, the Prime Minister has regularly monitored the progress of projects through the PRAGATI platform. This led to the successful completion of various long-delayed projects.

The last eight years have witnessed a remarkable improvement in connectivity in the country. The daily average highway construction reached an all-time high and has consistently remained far

higher than pre-2014 levels. Similarly, a rapid increase in the construction of rural roads has made access to roads nearly universal in the hinterland. Indian railways has also witnessed a massive capacity expansion in the last eight years through line doubling and electrification of railway tracks. In just eight years, the Modi government has built and operationalised 70 airports and ensured air connectivity to innumerable tier 2 and tier 3 cities. Metro rail is not limited to metropolitan cities anymore. In the last eight years, metro rail projects have reached 20 cities. Improved connectivity has proven to be a game-changer for the Indian economy. It has facilitated commerce and unlocked the economic potential of numerous towns and cities. Also, connectivity has reduced costs and logistical hurdles for Indian enterprises.

Prime Minister Narendra Modi has often suggested that connectivity in the digital age isn't limited to physical connectivity. Digital connectivity and IT infrastructure have become critical determinants of economic growth. To unleash the power of high-speed

internet, the government has now resolved to connect all six lakh plus villages.

The Pradhan Mantri Gati Shakti Masterplan announced by Prime Minister Narendra Modi demonstrates a new vision for a new India. This is the most extensive plan for infrastructure development in the history of independent India, as the government plans to invest nearly Rs. 100 lakh crore in the coming years. Integrated long-term planning under Gati Shakti will improve last-mile connectivity and multi-modal connectivity across the country and bolster India's economic progress for many decades. Rather than taking a myopic project-based approach, the master plan provides a comprehensive strategy for infrastructure development in the country. The lack of coordinated planning has led to massive wastage of public resources in the past.

The new infrastructure will make India one of the leaders in the global supply chain and ensure that it remains the world's most preferred destination for investment. Gati Shakti will also lead to the creation of a large number of direct and indirect jobs since infrastructure is known to be a job-intensive sector.

HEALTHCARE AND PANDEMIC MANAGEMENT

OVERVIEW

The Covid pandemic has been the most significant public health challenge for any government since independence. Despite the stiff challenge, India not only remained resilient and managed an effective response but also emerged as a global role model. Prime Minister Narendra Modi's remarkable leadership and consistent efforts by the government since 2014 to augment India's healthcare capacity helped the country successfully fight the pandemic.

The Modi government undertook a science-based approach for managing the pandemic. In early 2020, when many global leaders refused to even consider Covid to be a serious threat, India had already initiated its Covid management policy. For instance, even before a single Covid case was reported in the country, India had started screening travellers arriving from abroad. Moreover, realising that essential supplies for pandemic management required coordination across various sectors, Prime Minister Narendra Modi adopted a 'whole of government' approach. This ensured that various government departments worked simultaneously and coordinated their actions.

The paradigm shift in India's healthcare system since 2014 was visible during the pandemic. Accessible and affordable quality healthcare has become a reality for citizens. Earlier, medical expenditure used to be a severe economic burden for low-income households and often led them into debt traps. In 2018, the Modi government gave a permanent relief from this burden to around 18 crore households by launching the Ayushman Bharat - Pradhan Mantri Jan Arogya Yojana, the world's largest health insurance programme.

The government's telemedicine programme - eSanjeevani, bridges the urban-rural divide in access to specialist doctors. The Jan Aushadhi Kendras, located in more than 700 districts, provide quality generic medicines to citizens at affordable rates. The government has overhauled the country's immunisation programme by launching Mission Indradhanush, which has protected an entire generation from diseases that could have led to massive expenditure on medical treatment.

The Modi government has brought a crucial turnaround in medical education. Few government colleges, high fees

in private medical colleges, and massive corruption in seat allocation had severely limited opportunities for medical education earlier. In the last eight years, the Modi government has approved/established 15 AIIMS and innumerable new medical colleges. Further, the government's bold decision to replace the Medical Council of India with the National Medical Commission has ended corruption in medical education. In 'New India,' a talented student from a humble background in the hinterland can fulfil her dream of becoming a doctor.

In the past year, India has successfully rolled out the world's largest vaccination drive ever. This marks a landmark change for India. In the past, the country has had to wait for decades and lose innumerable lives before starting vaccination. Until now, more than 1.9 billion doses of Covid vaccine have been administered across the country. It is a historic achievement that India has been able to conduct this massive exercise entirely through indigenous vaccines.

The Modi government's multi-dimensional outlook covering preventive and curative healthcare has led to an improvement in individual wellness rather than merely improving health outcomes.

From no domestic manufacturing capacity of PPEs to **5 lakh kits per day**

1,500+ **PSA plants** sanctioned by the central government

5.20 crore **teleconsultations** through HWCs

POINTS TO REMEMBER

Ahead of the curve, due to proactive leadership

- At a time when many world leaders failed to even recognise COVID-19 as a threat, even before India had a single case, **screening began in airports.**
- Long before many other countries took it seriously, in the first week of March 2020, **PM Modi said he would avoid gatherings** such as Holi Milan and set an example.
- Mask mandates were enacted in large parts of India **long before the WHO** called for them.
- At a time when many countries were only thinking of massive mortalities, in April 2020, India had already **set up a vaccine task force** to save lives.
- India started using Rapid Antigen Tests to speed up testing long before WHO

recommended it.

- The fact that India went into an **early lockdown** has been universally acknowledged. This helped ramp up medical infra.

Future-proofing India with PM-ABHIM

- PM–Ayushman Bharat Health Infrastructure Mission to invest **Rs. 64,180 crore** on health infra.
- Support for 17,788 rural health and wellness centres in 10 high focus states.
- Establishing 11,024 urban health and wellness centres in all the states.
- 3,382 block **public health units** in 11 high focus states.
- Setting up integrated **public health labs** in all districts.
- Establishing **critical care hospital blocks** in all districts with a population

of more than 5 lakh.

Digital is the way – ABDHM

- With the success of CoWIN and Aarogya Setu, the **power of tech in healthcare** has been seen.
- Ayushman Bharat Digital Health Mission (ABDHM) is creating a seamless online platform for healthcare.
- Citizens create their ABHA (Ayushman Bharat Health Account) numbers, to which their **digital health records are linked.**
- With the citizen’s consent, this data can be accessed by healthcare professionals.
- ABDM facilitates **evidence-based decision making** for effective health interventions.
- **24.13 crore ABHAs** have been created so far!

NATIONAL SECURITY AND FOREIGN POLICY

OVERVIEW

The Modi government won the people's hearts in 2014 with a simple yet powerful mantra of putting 'India first.' From protecting our nation's borders to giving a befitting response to our adversaries, from promoting India's interests abroad to safeguarding Indians settled abroad, Prime Minister Narendra Modi's decisions have consistently reflected his promise of 'India First'.

The Prime Minister's zero tolerance for terrorism has ensured that the country is much safer today. In stark contrast to the earlier era, when our citizens used to be under attack at will, our citizens feel much more secure. Over the last eight years, India has made terrorism a significant issue on global platforms and taken the lead in the world's battle against terrorism.

Under PM Modi's leadership, India is getting accustomed to taking giant strides rather than small steps. This spirit of 'New India' is reflected in our rapidly rising defence production and exports. From being a country that was

heavily dependent on imports for even basic weapons and defence equipment, India is moving towards becoming self-reliant in defence production. Defence exports have increased over 6-fold in the last eight years, and India is exporting defence equipment and weapons to many countries. This success has been possible due to government efforts such as providing appropriate incentives for defence production, enabling foreign investment, and building defence industrial corridors.

The defence industry is emerging as one of the most vibrant sectors of the Indian economy. In the last eight years, innumerable new jobs have been created in the industry, and the surge in exports has helped in improving India's trade deficit. Moreover, self-reliance in defence production also strengthens our diplomatic interests across the globe.

There has been an unprecedented strengthening of India's position abroad in the last eight years. India's voice is now being heard and respected by countries across

the globe. From climate change to international conflicts, from terrorism to global trade, the world is eagerly looking towards India for its views and solutions.

Since 2014, Indian diaspora located across the globe has felt assured that PM Modi is always looking out for their safety and wellbeing. They know that if an adverse situation arises, the Indian government will leave no stone unturned to protect them. In the past year, the government ensured the safe evacuation of hundreds of stranded Indians in Afghanistan under Operation Devi Shakti. As a guardian of Indic culture and traditions, the government ensured that swaroops of the Guru Granth Sahib were safely brought to India. Earlier this year, when hundreds of Indian students were stranded in Ukraine after the Russian attack, India launched Operation Ganga to rescue them safely. From overcoming logistical hurdles to using diplomatic channels, the Modi government has consistently gone to great lengths to ensure its citizens' safety.

Ordinance Factory Board converted into **7 defence PSUs**

Over **26 crore** COVID-19 vaccines for over 100 countries through **Vaccine Maitri**

POINTS TO REMEMBER

Zero-tolerance to terrorism

- **No major terrorist attack** in Indian cities in non-conflict zones since 2014.
- Appropriate response to cross-border terrorism through **Surgical Strikes in 2016 and Air Strikes in 2019**.
- Sponsors of terror have been **globally isolated** and cut to size.
- India has made **terrorism a global issue** and is leading global discussions on this issue.
- Strengthening legal framework through **UAPA** amendment.

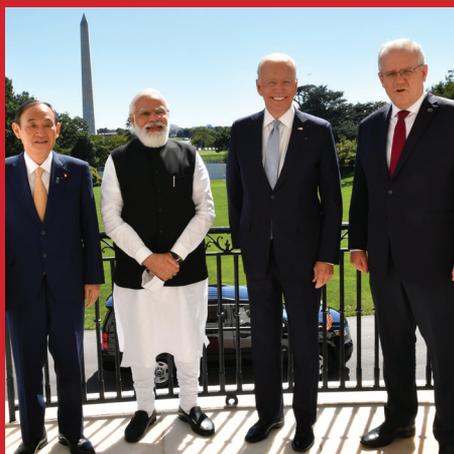

What is a positive indigenisation list and why does it matter?

- Three positive indigenisation lists with 1548 items were released since August 2020.
- These lists contain a **roadmap of those weapons, arms and systems that India will not import** in future.
- Knowing such a roadmap and mandate for domestic procurement helps domestic manufacturers ramp up production.
- This boosts India strategically and at the same time, creates jobs for youth.

Investment for Aatmanirbhar defence sector

- **FDI limit in defence raised** to 74% through automatic route.
- In Budget 2022-23, **68% of the capital procurement** budget for Defence is for domestic industry.
- Incentives for **defence corridors** in Uttar Pradesh and Tamil Nadu.
- Defence corridor in Bundelkhand of Uttar Pradesh will transform the poor region into a powerhouse.

ECONOMY
AND
REFORMS

OVERVIEW

The global Covid-19 pandemic since 2020 had a severe economic fallout and affected all countries across the globe. While many economies continue to struggle with sluggish economic growth and record-breaking inflation, India remains the sole bright spot. This has been recognized by global institutions such as the IMF and World Bank which have forecasted India to be the fastest-growing country among major economies in the world. Various indicators of economic performance, from GST revenues to manufacturing activity, indicate that the Indian economy has not only bounced back but even breached pre-pandemic levels.

The Modi government's comprehensive approach for managing the economic fallout of the pandemic ensured minimal effects and swift recovery. The government's Aatmanirbhar Bharat plan turned the crisis into an opportunity and gave much-needed impetus to economic growth. The swift recovery can be attributed to extending adequate support to various sectors of the economy and a string of structural reforms since 2014. These reforms strengthened the Indian economy and enabled it to withstand the drastic effects

of the pandemic. The Modi government's dynamic FDI policy has made India the preferred global destination for investment. Moreover, numerous decisions for improving the ease of doing business have promoted both domestic and foreign investment. Unlike earlier governments, the Modi government has made MSMEs, a central focus of its economic policy. The government's Emergency Credit Line Guarantee Scheme during the Covid pandemic protected more than one crore MSMEs and saved them from possible permanent closure. Moreover, reforms such as revision of MSME definition and changes in labour and environment laws have allowed MSMEs to expand their operations and grow.

PM Modi's clarion calls for 'Make in India' and building an Aatmanirbhar Bharat have led to a transformation of India's manufacturing sector. This has also given a huge boost to our exports which have crossed more than \$400 billion for the first time in the country's history. The Production Linked Incentives (PLI) schemes have led to a turnaround in numerous sectors of the economy. From a net importer earlier, India has become a manufacturing hub for

mobile phones and is annually exporting mobile phones worth more than \$5.5 billion. PLI Schemes across 14 sectors have created lakhs of jobs and placed the Indian economy on a rapid growth trajectory.

PM Modi has consistently assured the country's wealth creators adequate support in their efforts towards innovation and making India self-reliant. This is reflected in his personal focus and support for the Indian Semiconductor Mission (ISM) and its vision of building a semiconductor and display manufacturing ecosystem in India. This will make India one of the few countries with such manufacturing capabilities and further boost economic wellbeing and job creation. Global acknowledgement of India's economic progress is visible in numerous countries' desire in particular the developed countries to quickly finalize trade deals with India.

The dream of a digital economy is becoming a reality. Over the last few years, UPI has already become the preferred mode of payment. From street vendors to luxury stores, from Dhabas to five-star hotels, everyone is using UPI for making and accepting payments. Cashless transactions not only improve ease of living but also expand formalisation of

* * *

the economy.

SNAPSHOT

India to be one of the **world's fastest growing major economy** in 2022

40% of global real-time digital payments happened in India in 2021

Rs. 27.1 lakh crore Aatmanirbhar Bharat Package during Covid saved economy

Services PMI reached **ten year high of 58.4** in October 2021

Monthly GST collections at all-time high of **Rs. 1.68 lakh crore** in April'2022

Record **\$670 billion** of goods and services exports in FY22

Over **Rs. 3.19 lakh crore** sanctioned for MSMEs under **ECLGS**

PLI schemes to create **60 lakh additional jobs** over next 5 years

From importer of mobiles to **\$5.5 billion** in mobile exports for 2021-22

Over **Rs. 5.49 lakh crore** of **bad loans** recovered

Highest ever **annual FDI inflow** of **\$83.57 Billion** in FY 2021-22

India is now home to **107 Unicorns**

POINTS TO REMEMBER

World's fastest growing major economy – why growth is not just a number

- There is a global consensus that India will remain the **world's fastest growing** major economy.
- High growth will lead to **greater resources** for the government and allow further expansion of welfare schemes and infrastructure projects.
- High growth leads to the creation of **new employment opportunities**.
- New opportunities lead to a steady rise in incomes and **distribution of benefits of growth** to every section of society.

Aatmanirbhar Bharat: turning adversity into opportunity

- Robust economic management by PM Modi since the pandemic started

has **turned adversity into opportunity**.

- All economic indicators pointing towards India's economic resurgence.
- From MSMEs to MNCs, all firms have witnessed expansion in output and contributed to a **historic rise in services, manufacturing and exports**.
- Hiring sentiment at an all-time high in many sectors, **ensuring growth converts to jobs**.

Reforms by conviction and consensus

- PM Modi has started a new trend of reforms by conviction and consensus by personally pushing **many structural reforms** at a difficult stage.
- Cooperative federalism means the **Centre is encouraging states** to voluntarily undertake

reforms, by incentivising them.

- Reforms have protected the interests of all stakeholders.

Building a better economy

- Introduction of Goods and Services Tax (GST) has led to **greater formalisation**.
- **Sharp decline in NPAs** and economic offences due to strict action by the government for recovering dues.
- IBC has salvaged the situation for the Indian banking and corporate sectors.
- India is rapidly transforming into a **'Digital Economy'**.

* * *

Creating a base for 'Growthade'

- Record resource mobilisation through IPOs from Rs. 1,205 crore in 2013-14 to Rs. 1.12 lakh crore in 2021-22
- National highways increased from 91,287 km in 2014 to 1,41,000 km in 2021-22
- Number of operational airports increased from 74 in 2014 to 142 in 2022
- Extension for availing 15% tax rate for new manufacturing units till 2024, and tax incentives by a year for start-ups, will give a boost to sectors that have flourished in the last few years and created jobs
- Scheduled Commercial Banks (SCBs) gross non-performing assets (GNPA) ratio fell to a six-year low of 5.9% in March 2022
- 2021 saw a housing up-cycle after a decade, with prices and volumes surging

PERSPECTIVE

India is now the **5th largest** economy of the world

GLOBAL CONSENSUS ON INDIA'S RAPID GROWTH

India to be the fastest growing major economy as per various global institutions.

EASE OF
DOING
BUSINESS

OVERVIEW

P rime Minister Narendra Modi's vision of making India an attractive investment destination and the transformative reforms over the last eight years led to a historic improvement in ease of doing business and an unprecedented rise in foreign direct investment. This is not only supporting existing enterprises but also encouraging a new wave of risk-taking, be it among small entrepreneurs or new start-ups. Rather than being merely an urban phenomenon, start-up culture has now spread to all parts of the country.

Since 2014, rent-seeking and red-tapism have been replaced by a red carpet. The government is not an obstacle in the path of risk-takers but is an active enabler. Entrepreneurs and investors in India are now delighted by a business-friendly environment and a government that actively addresses their concerns and redresses grievances. This paradigm shift has been made possible through landmark decisions such as removing retrospective taxation and Angel Tax.

The Prime Minister's mantra of transparency and reducing compliance requirements demonstrates

a government that trusts its citizens. This trust is being reciprocated in the rising number of taxpayers and record tax collections. Meanwhile, the tax cuts have increased the investible surplus available to companies. Similarly, promoting self-regulation, self-certification, computerised random labour inspections and faceless assessment/appeal in taxes has not only dealt a blow to 'Inspector Raj' but also improved compliance.

The National Single Window System allows obtaining all approvals through a single platform. Moreover, the Modi government has reduced unnecessary compliance burden by repealing more than 1,400 archaic laws and nearly 25,000 compliances. These used to create unnecessary costs and hurdles for Indian enterprises.

From the ease of starting a business to ease of getting electricity, from labour reforms such as the new labour codes to the decriminalisation of many sections of the Companies Act, the gamut of different steps taken firmly establish that the environment for wealth creators is the best that it has ever been. Never before has India witnessed such enthusiasm

for entrepreneurship and start-ups. The number of new government-recognized start-ups annually has increased by almost 19 times between 2016-17 and 2021-22.

India's efforts to improve the ease of doing business are being acknowledged on the global stage. This is evident in consistent improvement in various international rankings. For instance, the country's ranking in the World Bank's Ease of Doing Business Index surged from 142 in 2014 to 63 in 2019.

Apart from numerous reforms and landmark decisions, Prime Minister Narendra Modi has successfully led a mindset transformation. Unlike previous governments, the Modi government not only considers entrepreneurs as wealth creators but also as partners in national development. Concerted efforts to improve the Ease of Doing Business have led to a historic expansion in the pool of wealth creators. This has increased resources available to the government for poverty alleviation and infrastructure creation. Further, lower compliance costs not only lead to greater earnings for firms but also higher incomes for employees and more hiring.

POINTS TO REMEMBER

Painless, faceless, seamless tax system

- Tax rates are not a pain anymore. India has one of the **lowest corporate tax rates of 15%** for new domestic manufacturing companies.
- For existing companies, the government **reduced corporate tax rates from 30% to 22%**.
- Retrospective tax adversely affected India's image among global investors and has accordingly been scrapped. Similarly **angel tax has also been scrapped**.
- Most tax processing and assessments happen online, which makes filing returns, assessments, appeals and refunds **seamless and quick**.

- **Faceless assessment and appeals** remove chances of harassment, reducing inspector raj.

From red-tapism to red carpet

- Various economic reforms and incentives have made India the most **preferred destination for investment**.
- **Single window system** is available for approvals and clearances, reducing hassles.
- The number of documents needed for company incorporation has been reduced.
- **FDI rules have been liberalised** in many sectors and hence, FDI has broken all records in the past few years.

Trust in industry and entrepreneurs

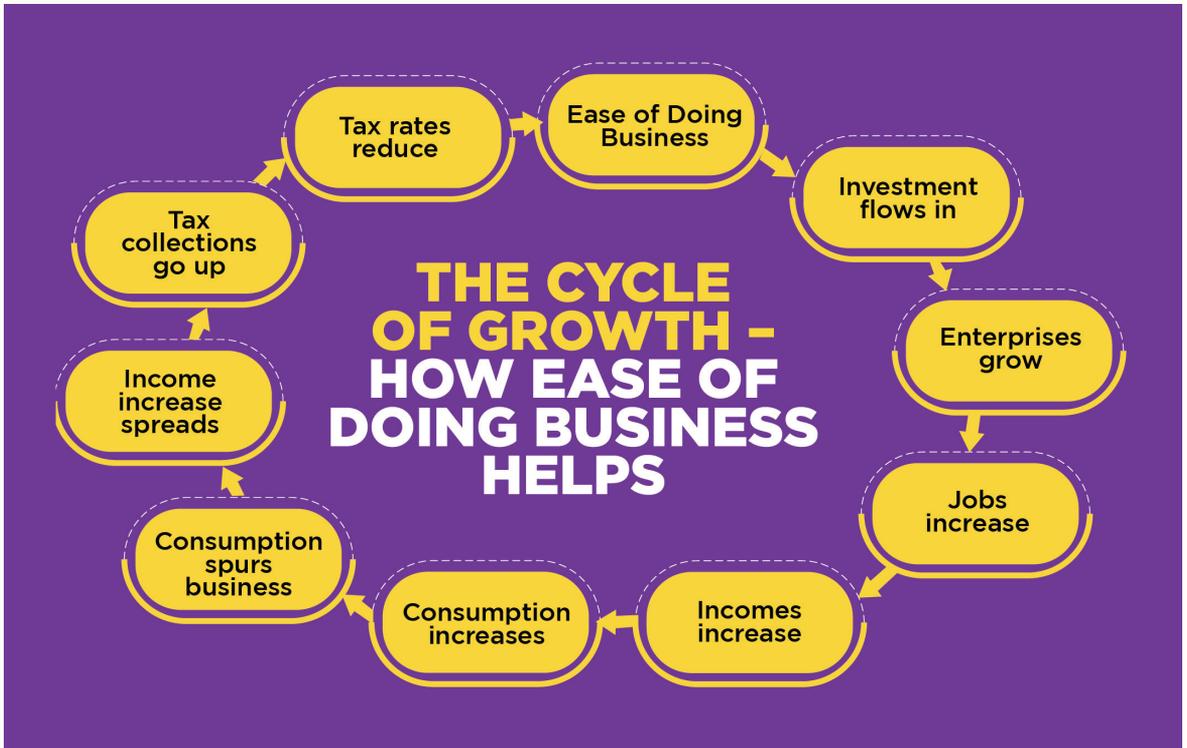

- The '**Growth Ambassadors of India**', our entrepreneurs are powering India's growth story by creating jobs.
- A new mindset of trust has been created where the government and citizens trust each other.
- **Self-regulation and Self-compliance are the norm**.
- **Ending 'Inspector Raj'**, reforms in labour inspection processes and environmental laws have curbed rent seeking and corruption.

* * *

Did you know?

- PM Modi made it easier to start a business by reducing the number of approvals needed from 14 to just 3 steps.
- Since 2014, PM Modi has repealed more than 1,500 Union laws that were redundant or outdated.
- India's fintech adoption rate (87%) is higher than the global average (64%), making it one of the largest digital markets in the world.
- India's goods exports touched a record \$422 billion in FY2022, which is more than the entire GDP of Pakistan (\$350 Billion).
- Electronics manufacturing has grown by 300% since 2014.
- India is the third-largest startup ecosystem in the world after the United States and China.
- India's position in World Bank's rankings for getting construction permits rose from 181 in 2018 to 27 in 2020 under PM Modi.
- No. of patents granted has gone up by 77% - from 6,326 in 2015-16 to 28,391 in 2020-21

PERSPECTIVE

EASE AT EVERY STEP

EASE OF STARTING BUSINESS:

The number of steps required for company incorporation reduced from 14 in 2014 to 3 in 2022.

EASE OF COMPLIANCE:

The National Single Window System provides a single platform for obtaining all required approvals.

EASE OF EXIT:

The Insolvency and Bankruptcy Code allows easy winding up of companies.

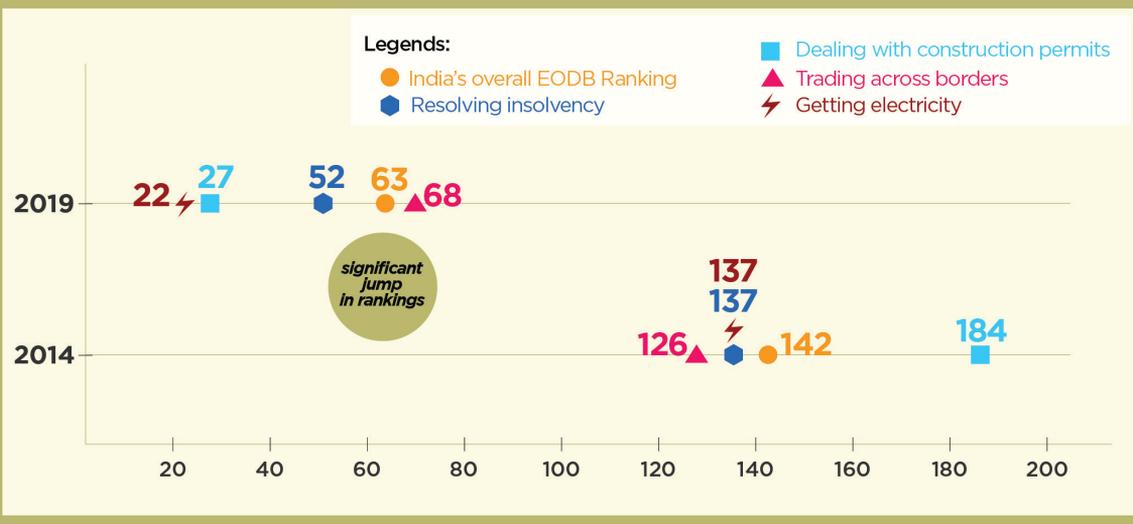

EASIER TO PROTECT INTELLECTUAL PROPERTY

Obtaining Patents, Trademarks, and Copyrights has become much easier

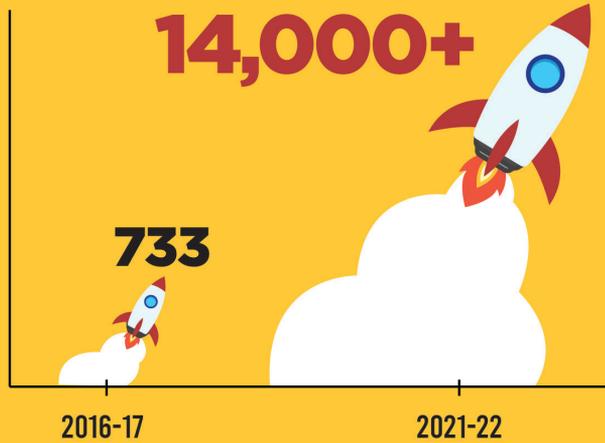

- Reduction in filing fees.
- Introduction of e-filing.
- Simplifying the process and reducing issuance time.

NORTHEAST
- A GROWTH
ENGINE

OVERVIEW

The government's Northeast policy has successfully changed the region's economic landscape and has also brought hearts closer. Apart from responsiveness to the needs of the people, this has been made possible by improving physical connectivity and making the region's interests and policy priorities salient to the central government.

Earlier, the Northeast was never considered mainstream and repeatedly side-lined in policymaking. This was evident in the number of visits by earlier Prime Ministers and members of their Cabinet to the region. Over the last eight years, Delhi itself has reached the doorstep of the Northeast through regular visits by the Prime Minister, his ministerial colleagues, and senior bureaucrats. The Prime Minister has himself become an ambassador of Northeast culture as he proudly wears traditional attire from the region in public meetings. Through him, the Northeastern culture has reached the entire

country and beyond.

Various states in the Northeast have faced severe internal security challenges for decades. Under the Modi government, the centre has seriously tackled these challenges and saved innumerable lives through proactive response. The signing of peace accords has led to peace and a decline in violence in the region. These efforts have paved the way for reducing AFSPA coverage in the region. Long pending disputes between various states in the Northeast had been a major concern in the region. Many decades-long disputes are finally getting permanently resolved through the active efforts of the Modi government. This will give a further boost to integration and trust and pave the way forward for long-term peace and progress.

Lack of physical connectivity and poor infrastructure had contributed to the Northeast's isolation for many decades. Innumerable long-pending infrastructure projects were completed and delivered to

the public in the last eight years. The long list of projects includes iconic projects such as Bogibeel Bridge, inaugurated by PM Modi in 2018, sixteen years after its announcement by PM Atal Bihari Vajpayee. Even basic railway connectivity was lacking in the region until the Modi government took it up on a mission mode. Over the last eight years, the Modi government has focused on expanding the railway network in the region.

The Modi government has extended unprecedented support for reviving traditional sectors of the economy in the region. The landmark decision to declare Bamboo as grass and the launch of the National Bamboo Mission gave a fresh impetus to the production of Bamboo based products in the region. On numerous occasions, Prime Minister Narendra Modi has highlighted the success of Sikkim in promoting organic farming and becoming the world's first 100% organic state. From being on the margins of the India story, the Northeast is quickly becoming one of the country's growth engines.

Taking Delhi to the doorstep of the Northeast

PM Modi has visited the Northeast at least 50 times. This is a record for any Prime Minister. When he shows his priorities through such actions, the whole government machinery understands the importance of this region.

Peace for Progress

- Naga Peace Accord, 2015
- Tripura Peace accord, 2019
- Bodo Peace Accord, 2020
- Bru-Reang Peace Accord, 2020
- Karbi-Anglong Peace Accord, 2021
- Assam-Meghalaya boundary agreement, 2022
- Tribal Peace Accord, 2022
- Peace accords have reduced violence considerably in the region.
- Significant drop in insurgency and civilian

deaths.

- Decades long border disputes finally getting resolved amicably.

The track to growth

- The Modi government is steadily bringing all parts of the Northeast on India's railway map.
- Three state capitals— Assam, Tripura and Arunachal Pradesh – are connected by broad gauge rail.
- Work on connecting other state capitals is on track.

- Reducing travel time between Northeast and other states improves economic opportunities.
- Connectivity will enable commerce and the sale of goods produced in the Northeast across the country.
- Economic activity will reduce migration for employment and fuel further development.

CONSERVING
CULTURAL
HERITAGE

OVERVIEW

India's cultural traditions and rich heritage have never got the prominence they got in the last 8 years. Prime Minister Narendra Modi takes pride in the country's rich civilizational history and gives due recognition to the cultural heritage. The Modi government is deeply aware of the nation's rich culture and has taken much-needed steps for preserving our heritage.

After decades of neglect, various sites of civilizational significance have been redeveloped and revived through the efforts of the Modi government. The Kashi Vishwanath Corridor and various other projects in Varanasi have transformed the by lanes, ghats, and temple complexes in the city. The 900 km Chardham road project will provide seamless all-weather road connectivity to the four holy Dhams. PM Modi personally monitored the progress of redevelopment projects in Kedarnath, a temple extremely close to his heart. The newly unveiled statue of Adi Shankaracharya in the Kedarnath complex will be an eternal symbol of civilizational and cultural unity across regions. In August 2020, PM Modi participated in the Bhoomipujan for the

Ram Mandir in Ayodhya, a memorable moment in the history of modern India.

Bringing back the nation's lost heritage has been a priority for the Modi government. Over centuries, innumerable priceless artefacts, some with deep cultural and religious significance, had been stolen and smuggled abroad. The Modi government adopted a proactive approach for 'bringing back our gods'. On numerous foreign visits, PM Modi discussed this matter with global leaders and multilateral institutions. Today, innumerable countries are themselves reaching out to India to send back stolen artefacts and antiquities. India's efforts have, in fact, inspired similar efforts in Africa and other parts of the globe. PM Modi has successfully initiated a global movement.

The Modi government has extended special recognition to a wide range of nation-builders. The Statue of Unity in Gujarat, the world's largest statue, has not only put Kevadia on the global tourism map but also become a spot for remembering the man who delivered national unity. Projects such as revamp of the Jallianwala Bagh complex and the development of sites related to Dr. B.R.

Ambedkar as 'Paanchteerth' will etch the sacrifices and achievements of our nation-builders and freedom fighters in public memory. The Modi government has given recognition to all national heroes irrespective of their politics or ideology. This is best showcased in the newly inaugurated Pradhan Mantri Sangrahalaya, a museum in Delhi celebrating the lives and contributions of all Prime Ministers of India.

Innumerable bravehearts have lost their lives while protecting Bharat Mata. In 2019, Prime Minister Narendra Modi inaugurated the National War Memorial in New Delhi which remembers those who made the supreme sacrifice for the country. Though it had been under consideration since 1961, not much progress was made in this crucial project. Prime Minister Narendra Modi gave much-needed momentum to this project and work started after approval in 2015.

POINTS TO REMEMBER

IN THE FOOTSTEPS OF LOKMATA AHILYABAI HOLKAR

Lokmata Ahilyabai Holkar, one of the greatest queens, is still remembered for rejuvenating temples. PM Modi is following in her footsteps!

Lokmata Ahilyabai Holkar	PM Modi
Built the present Kashi Vishwanath Temple in Varanasi	Developed the Kashi Vishwanath Corridor around the temple
Revamped famous ghats of Varanasi	Ghats cleaned; Ganga pollution reduced through Namami Gange
Refurbished Sarayu Ghat in Ayodhya	Bhoomipujan of Bhavya Ram Mandir done
Rebuilt Juna Somnath Temple	Development works around the Somnath temple, building Parvati Mandir

Unlike leaders of the past, PM Modi wears his culture on his sleeve

- PM Modi has never shied away from giving our culture its due respect.
- The government, too, works to promote India's culture and values.
- In gifts that PM Modi gives to dignitaries and the places he takes world leaders to, our cultural heritage can be seen.
- He has also made proactive efforts to ensure the return of stolen antiquities and artefacts.

From Somnath to Kedarnath, from Ayodhya to Ajmer, from Varanasi to Velankanni

- Modi government considers it a duty to preserve sites of importance, irrespective of

region or religion.

- While PM Modi's work in Somnath, Ayodhya, Kedarnath, etc, are well known, places of every religion are being developed under PRASHAD scheme.
- Upgrade of Cheraman Juma Mosque, Hazratbal, Ajmer, St Thomas Shrine and Velankanni has been taken up.
- St Luke's Church in Kashmir was renovated and reopened after 3 decades.

Honouring India's greats

- Statue of Unity honours Sardar Vallabhbhai Patel's contribution to creating a united India.
- Netaji Subhas Chandra Bose's legacy being honoured, from releasing files to installing his statue

at India Gate.

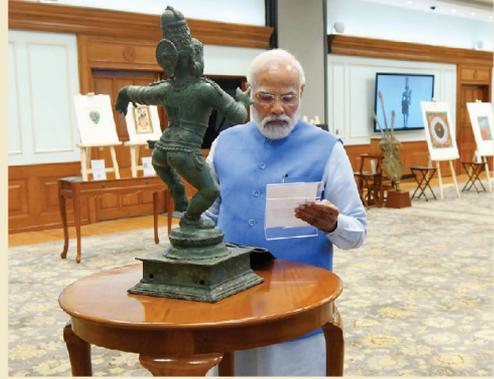

- Mahatma Gandhi's legacy carried forward through Sabarmati Ashram redevelopment.
- Panchteerth brings Dr. Babasaheb Ambedkar to the centre of India's discourse and recognizing his contributions.
- Jallianwala Bagh memorial's uplift helps make memories of the freedom struggle relevant to future generations.
- 10 Tribal Freedom Fighter Museums being developed.
- No political bias in recognizing and respecting nation builders. Neither one person, nor one party, but a museum for all Prime Ministers at PM Sangrahalaya.

* * *

PERSPECTIVE

DID YOU KNOW?

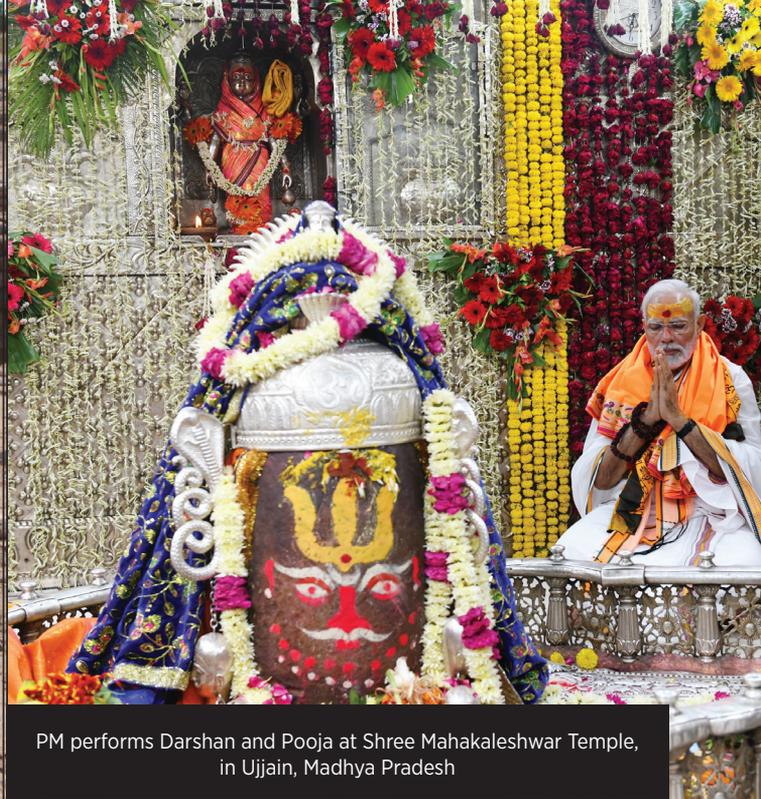

Before 2014, only 13 stolen antiquities were returned to India from abroad. **Since 2014**, due to PM Modi's sustained political and diplomatic initiatives, **228 stolen antiquities have been recovered** and are in various stages of return to India.

TECH-POWERED INDIA

OVERVIEW

P rime Minister Narendra Modi is India's first tech-savvy Prime Minister.

A tech-enthusiast since his youth, he has made technology and digital solutions central to governance. In Gujarat first, and now in India, he has worked on bridging the digital divide, democratising technology and bringing rapid digitalization of governance.

In the last eight years, there has been a meteoric rise in mobile ownership across India. The sharp decline in the cost of data has led to deep penetration of the internet, bridging the urban-rural divide.

Technology adoption by the government over the last eight years has ensured a remarkable increase in transparency in governance. Today, all government programmes have a digital dashboard that provides all details of beneficiaries. These dashboards have enabled citizens to hold the government accountable and considerably reduced leakages in public service delivery. Digital delivery of public services is eliminating corruption and promoting ease of living. From Direct Benefits Transfer to faceless tax assessments, reducing discretion is eliminating rent seeking tendencies in the officialdom and empowering

citizens. Technology has also made governance in India more efficient and effective. From the adoption of biometric authentication to the creation of digital single-window approval systems, governance is undergoing a paradigm shift in India.

The Modi government has effectively deployed technology and digital tools for ensuring transparency and plugging leakages in governance. For example, the introduction of Direct Benefits Transfer and Aadhar authentication in various welfare scams have led to the elimination of lakhs of ghost beneficiaries, enormous savings for the government, and timely delivery of benefits to citizens. In 2021-22, the government saved more than Rs. 2.23 lakh crore due to the distribution of benefits through DBT.

Even public procurement, a common avenue for bureaucratic corruption earlier, has now become digital as the Government e-Marketplace (GeM) portal is being utilized by government departments and PSUs for their procurement. The portal is successfully eliminating corruption and streamlining public procurement in the country.

The rapid digitalization

has also been an opportunity to unlock India's economic potential and fulfil the aspirations of millions of entrepreneurs. Innumerable tech-based start-ups across the country have been facilitated through various programmes such as Start Up India.

Under PM Modi, technology is being democratized. The programme to take optic fibre to every Gram Panchayat in the country is running at full steam. The cost of data is affordable. The digital divide is going to be a thing of the past as all segments of the country are actively using modern technology - from digital payments to communication. India is becoming a digital economy as UPI has become the preferred mode of payment for all merchants - from the local vegetable market to the biggest mall in the city. Digital delivery of vaccines through the CoWIN platform allowed India to ensure equity and accessibility in vaccine distribution.

India is leading a global revolution for digitalization. Other countries are looking towards India for providing tech solutions such as the CoWIN platform. As a responsible country, India is ensuring open-source access to these digital tools and supporting developing countries in their transition towards digitalization.

ENVIRONMENT
AND
SUSTAINABILITY

OVERVIEW

From the times of Chief Minister Narendra Modi to Prime Minister Narendra Modi, one consistent theme in governance is the illustration that development and environmental conservation can go hand-in-hand. Under PM Modi's leadership, there has been rapid development without hurting the environment and, in fact, while protecting it.

Over the last eight years, India has emerged as a global leader in the fight against climate change. From negotiations over global climate change deals to the adoption of renewable energy, India is leading international efforts for environmental protection and shaping the global agenda.

When PM Modi took over in 2014, India was globally seen as a roadblock in climate negotiations. However, the Prime Minister has given solutions to forge a path forward. Since COP 21, the Prime Minister's principle of climate justice has ensured that equity concerns aren't ignored in climate change negotiations. India has remained focused on providing a 'fair deal'. It has ensured that advanced economies cannot abdicate their responsibility towards environmental protection. At the same time, India is also meeting ambitious climate

goals.

At the COP 26 at Glasgow last year, PM Modi shared his five-point agenda - 'Panchamrit,' for countering climate change. This provides a comprehensive approach that most countries can replicate.

India's global efforts have been accompanied by consistent steps within the country by the Modi government. The Modi government has brought transparency and objectivity to environmental law compliance. This has not only generated trust in the government but also helped in ensuring that sustainable development becomes possible.

The government's remarkable efforts for environmental protection have led to many commendable achievements. There has been a significant increase in forest cover in the country. Over the past decade, the tiger population in India has more than doubled. While many countries fail to fulfil their climate targets, India has hit targets long before deadlines. For example, the target for achieving 40% of installed electricity capacity from non-fossil sources, which was set at COP 21, was fulfilled nine years ahead of schedule.

The Namami Gange programme, a flagship initiative of the government, has

successfully arrested pollution of the holy river and improved water quality at numerous locations. This cause has been extremely close to PM Modi's heart, as evident in his decision to donate all proceeds from an auction of gifts he received to the Namami Gange programme.

The last eight years have witnessed a rapid transition towards renewable sources of energy. India has had the fastest growth rate in renewable energy capacity addition among large economies. Numerous incentives for the renewable energy sector and lower cost of inputs have led to a massive decrease in renewable energy tariffs. Further, the UJALA programme has led to thousands of crores of savings while reducing carbon dioxide emissions.

People's participation has been central to the Prime Minister's vision of providing a clean and healthy environment. From cleanliness to avoiding single-use plastic, he has often encouraged citizens to make lifestyle changes to contribute to the environment. By transforming these causes into mass movements, he has ensured impact at scale rather than a temporary shift in public habits.

POINTS TO REMEMBER

Ensuring sustainable development

- Modi government has demonstrated that **development can go hand-in-hand with environmental protection.**
- Environmental law reforms under PM Modi have led to **both better compliance and ease of doing business.**

India is shaping the global climate change debate

- Unlike the past, India

is now a **leading voice** in climate change negotiations.

- India has made '**climate justice**' central to global climate change discourse.
- PM Modi's '**Panchamrit and LIFE – Lifestyle For Environment**' initiatives highlight India's position as a global role model in countering climate change.

Transformation of India's green landscape through Jan Bhagidari

- Big targets and speedy

achievement have been hallmarks of India's renewable energy policy.

- Since 2014, there has been a 22.5-fold increase in solar energy capacity.
- PM Modi has encouraged people's participation in environmental protection.
- From Swachh Bharat to the end of single-use plastic, he has motivated citizens and brought a voluntary change in everyday habits.

* * *

Did you know?

At the COP26 Summit in Glasgow, PM Modi pitched for a 'one-word movement' before the world in the form of 'LIFE' which stands for 'Lifestyle for Environment'

The Prime Minister called upon the world to make '**Lifestyle for Environment**' i.e. **LIFE** a global mission to fight climate change. The vision emphasizes not only energy production but also energy conservation and sustainable living. These solutions include energy-efficient ACs, geysers, heaters and ovens.

PERSPECTIVE

Prime Minister's PANCHAMRIT for protecting the environment

Reduce the total projected carbon emissions by **one billion tonnes** till 2030

Reduce the carbon intensity of the economy by **less than 45%** by 2030

Meet **half** of its energy requirements from renewable energy by 2030

Non-fossil energy capacity of **500 GW** by 2030

Achieving **net-zero** target by 2070 India – a global climate change leader

MASSIVE SAVINGS THROUGH UJALA LEDS

Namami Gange programme launched in 2014 as a flagship initiative

- 393 projects sanctioned at cost of Rs. 32,035.11 crore. Out of these 220 projects have been completed.
- Increase in Sewage Treatment Plant capacity has led to a cleaner river.
- Aquatic species like dolphins are returning.
- Millions of litres of pollutants that used to be dumped into the river stopped.

The story of India's massive renewable energy push

PM Modi promised the world that India would hit 500 GW non-fossil fuel based power capacity by 2030.

Ambitious? But India is already setting record pace.

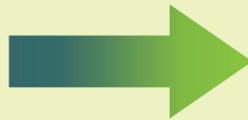

Non-fossil fuel based power is 41.59% of total installed capacity.

India's installed clean energy capacity grew a whopping **126%** since 2014!

As of March 2014

81.16 GW

was India's installed clean energy capacity.

In just 8 years, he has more than doubled that to

168.06 GW

Here's how India is an emerging global leader in renewable energy!

- India now has the **4th largest** clean energy capacity in the world.
- India has the **4th largest** installed wind energy capacity.
- India has the **4th largest** solar installed capacity.

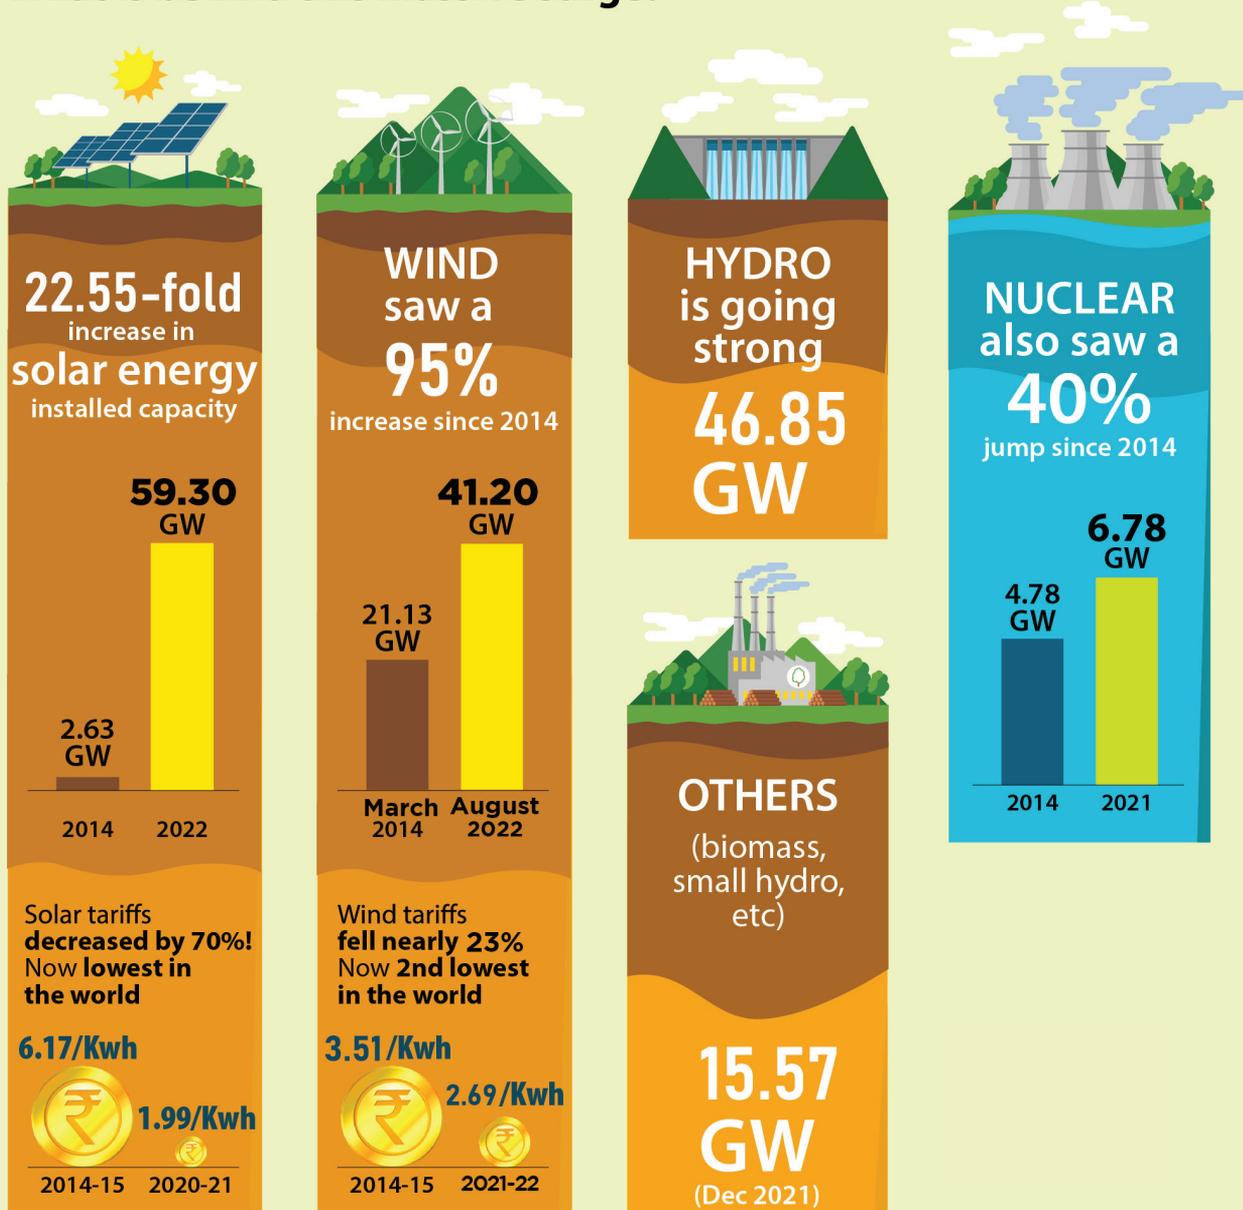

The Renewable Energy Country Attractiveness Index ranks countries on attractiveness of investment and deployment opportunities. See how India jumped in ranks...

FEBRUARY 2014

OCTOBER 2021

What is behind this massive surge?

It is not enough to increase capacity. Adoption matters too. Hence, tariffs have also been reduced.

India is leading by example

Achieved COP21 target of 40% energy from non-fossil fuel sources almost a **decade ahead of schedule**.

India remains on track to fulfil the **Sustainable Development Goals**.

Bringing A Global Transformation

PM Modi spearheaded the global initiative to form the **International Solar Alliance** which has 88 member countries.

GLOBAL PRAISE FOR INDIAN LEADERSHIP

David Malpass @DavidMalpassWBG

Good to see Prime Minister @NarendraModi at today's @G7 meetings – we discussed energy transition efforts, @WorldBank Group programs in India & the importance of debt transparency & sustainability.

I was also glad to affirm WBG support for India's upcoming @G20org Presidency.

World Intellectual Property Organization @WIPO

Good news! WIPO's Global Design Database and Global Brand Database have added India's national collections of:

- ◆ 2 million trademark records
- ◆ 58,000+ design models
